Atmosphera[®] Linea

Ceiling **Baffles**

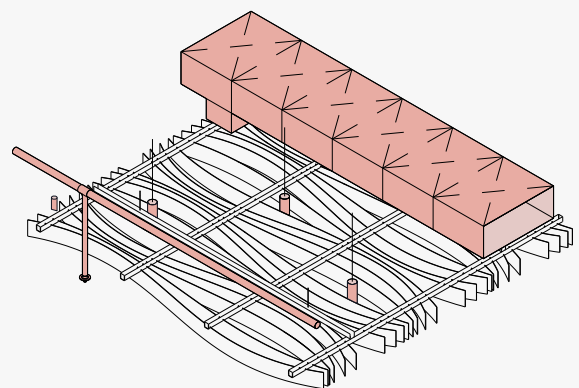

Our Key Features

Linea's ceiling baffles are on the straight and narrow, providing a firm determination to your ceiling. Linea offers ample fin spacing and depth to hide integrated drop down building systems. And thanks to its Soft Sound® fins, it brings sound control to any space as well, giving you a strong design and strong acoustics.

Reduce Noise & Enhance Acoustics

Atmosfera®'s Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. Atmosfera®'s material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

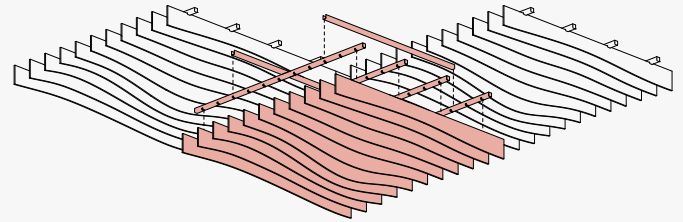

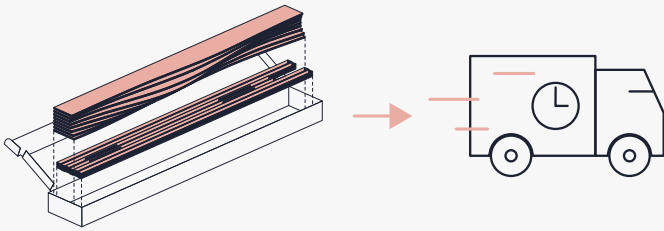

Open Accessibility in Plan

Atmosfera®'s open design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

Our Key Features

Faster Shipping & Installation

Because they're preconfigured, production starts as soon as you order. Once complete Atmosphera®'s easy-to-assemble modules are promptly shipped, helping you cut down installation times and meet your project deadlines.

Preconfigured Designs & Sizes

For a custom look without the custom price tag, pre-configured Atmosphera® modules offer innovative design impact with a quick and easy installation process. Achieve a cleaner design in a fraction of the time versus independently hung baffles.

Easily Field Modifiable

This system allows for some simple modification that can allow it to adapt to your space without having to design a custom system.

Continuous Straight Baffles

Utilizing a hidden fin and frame alignment system Atmosphera provides continuity in all directions across your space. Our custom formulated material thickness and density ensures rigidity that limits deflection.

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
