1 Understand the System

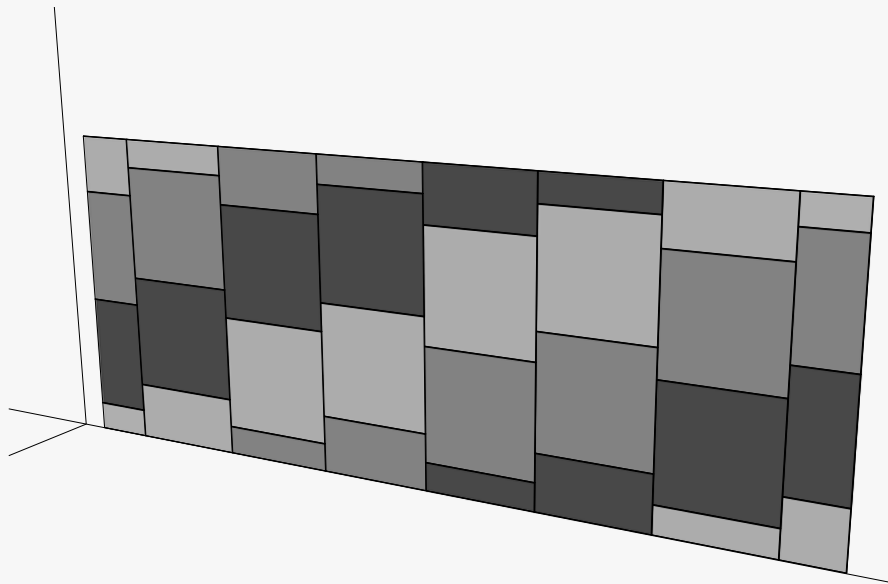

Standard Modules

Soft Sound® Tiles come in five sizes that allow for a variety of configurations. Arrow indicates direction of wood grain for optional Soft Sound® Wood Textures.

Multiple Modules

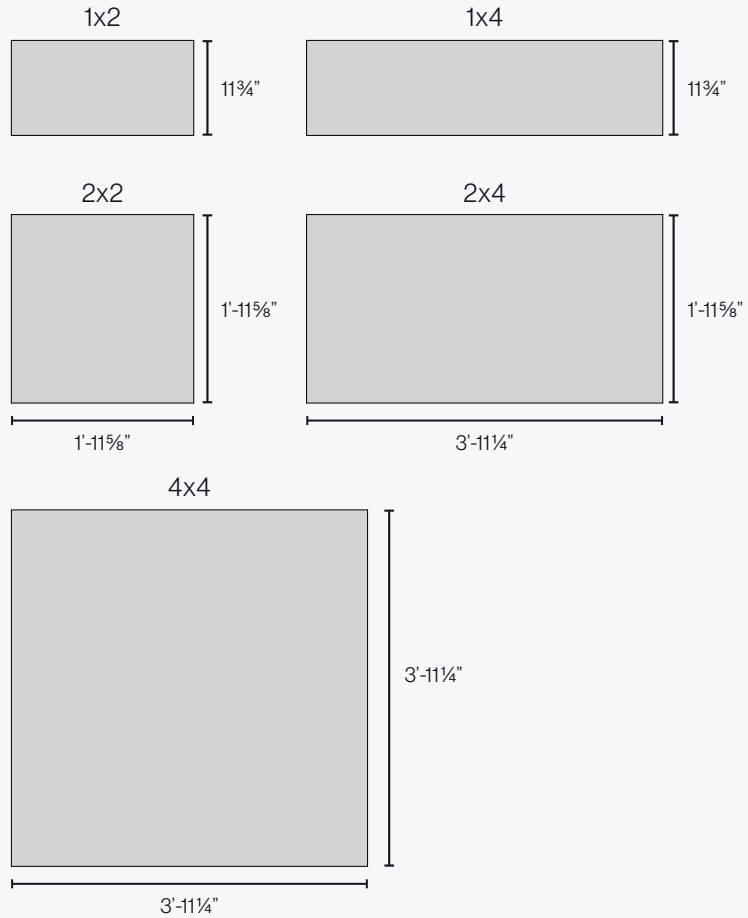

Create an acoustic collage using various SoftScreen® Groove panels in different colors and sizes for a truly unique layout.

1 Understanding the System

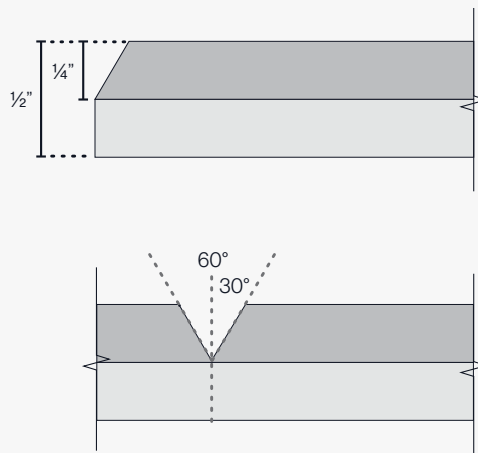

Dimensions

Soft Sound® can be installed with an air gap between the wall and the panels for higher acoustic performance.

Section

Soft Sound® Tiles are beveled at a 30° angle, creating a V-groove when modules are tiled together."

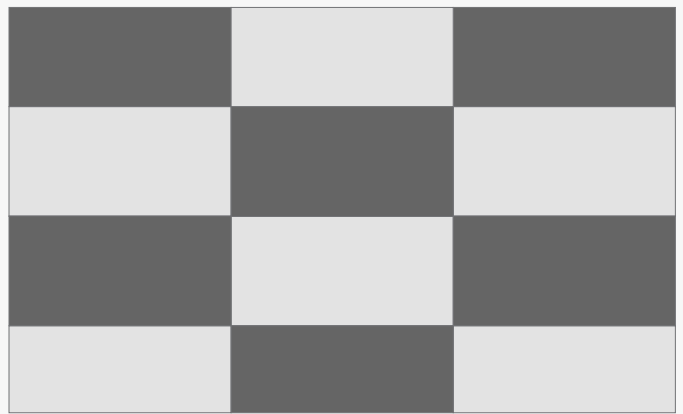

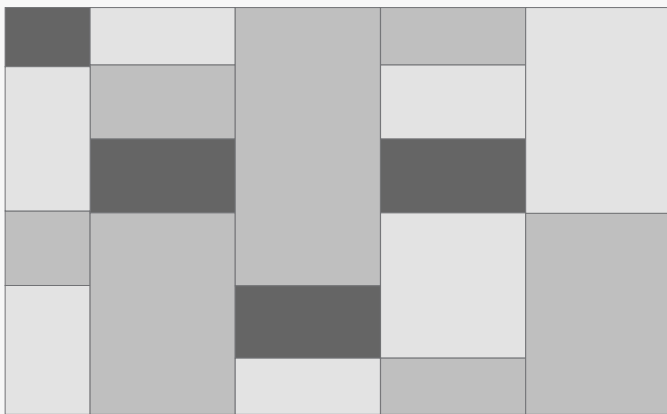

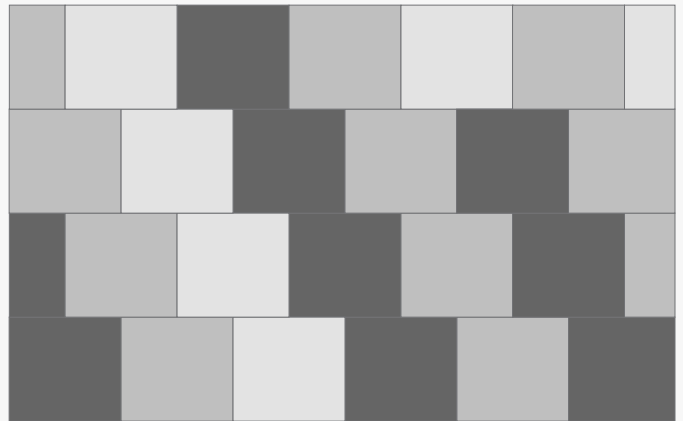

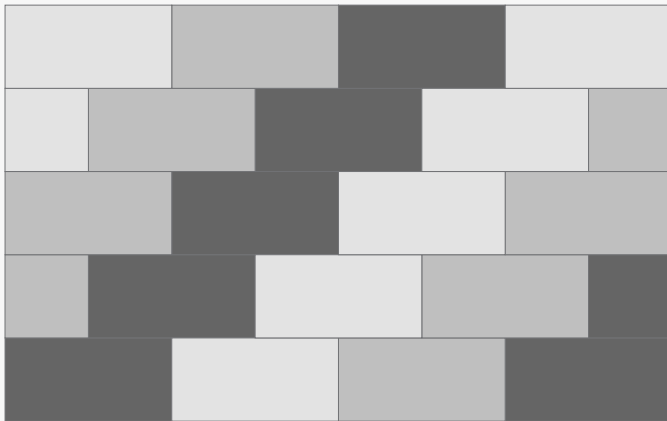

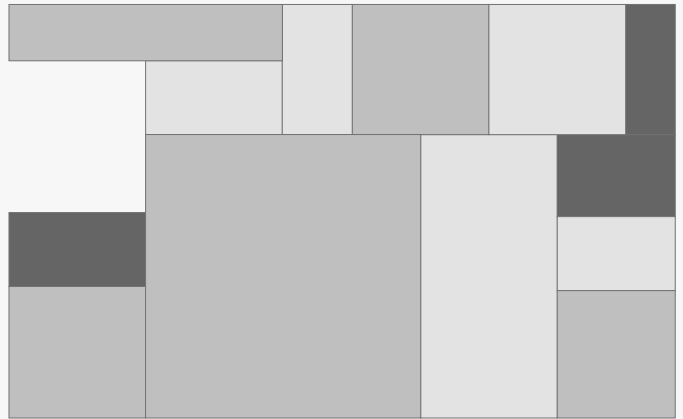

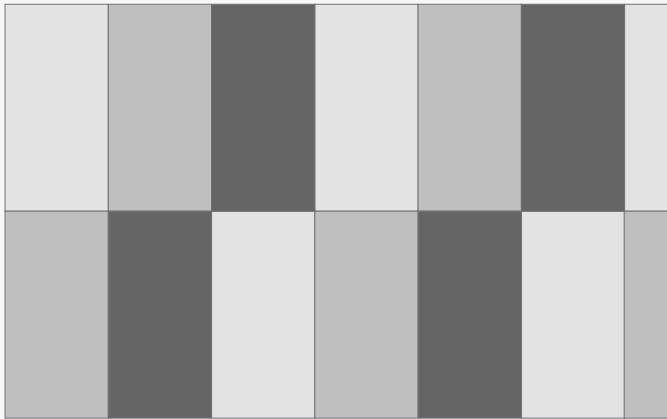

Looking for a more dynamic textured finish wall panel? Check out our Soft Sound Groove Coverings line.

① Understanding the System

Design Inspiration

Tile a near countless arrangement of patterns and designs, with the unlocked creative potential of Soft Sound® Tiles. Specify multiple colors from a vast library of finish options and premium wood finishes.

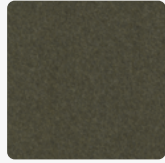

Offered in five distinct sizes to be used in tandem with one another, creating unique configurations. From linear designs, staggered blocks, checkerboards, or abstract layouts, with Soft Sound® Tiles, your imagination is the limit of creative design possibilities.

Truffle

Morel

Cypress

Pebble

 Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
