SoftGrid® Skyline

Ceiling **Baffles**

Our Key Features

SkyLine's acoustic ceiling modules were designed to look like an inverted skyline, as if a city lived on your ceiling. For a more dramatic look, the modules can be connected together to create a continuous, uninterrupted field of cityscape or can be shortened into smaller city blocks. And to avoid the loud city noise, SkyLine is made from our Soft Sound® material, so you get acoustic comfort.

Reduce Noise & Enhance Acoustics

SoftGrid®'s Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. SoftGrid®'s material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

Learn More about SoftGrid®

Continuous Baffles

Utilizing a hidden fin to fin alignment system SoftGrid® provides continuity in all directions across your space. In addition our optional hanging points offer a fine tuning capability for installers. Our custom formulated material thickness and density ensures rigidity that limits deflection.

Our Key Features

Expansive Soft Sound® Library

Choose from a large library of Soft Sound® colors and wood textures. Mix and match colors to accent fins and complement the color scheme of your space.

Open Accessibility in Plan

SoftGrid®'s open grid design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

Preconfigured Field Trimmable Solutions

SoftGrid® modules can be trimmed down to a minimum of four fin intersections. By rearranging our adjustable hangers, we make it easy for you to specify standard modules that can be easily field-modified around anticipated and unforeseen site conditions during install.

Duo Capability

Add new dimensions of style, mix colors and textures in a expanding range of dynamic combinations to fully achieve your design intent. Perfect for incorporating branding or composing a dynamic two-tone transformative field.

Soft Sound® Wood Texture Premium

① As with natural wood, variation in color and grain is expected and grain will not align across panels.

① Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

Product Specifications & Certifications

System Specs

Dimensions (WxLxD)	Skyline: 7'-6" x 7'-6" x 8 ⁹ / ₁₆ " Skyline Max: 9' x 9' x 8 ⁹ / ₁₆ "
Material	12mm Soft Sound® (PET), Stainless Steel
Openness in Plan	93%
Fire Rating	ASTM E84 - Class A
Acoustics	True NRC® (F-100 Method) Slope: 0.60 ; Slope Max: 0.40
Attachment Method	1/32" Stainless Cable and Hardware
Accessibility	Yes, quick release cables
Trimmability	Yes, per installation manual
