SoftShapes® Tri

Acoustic **Clouds**

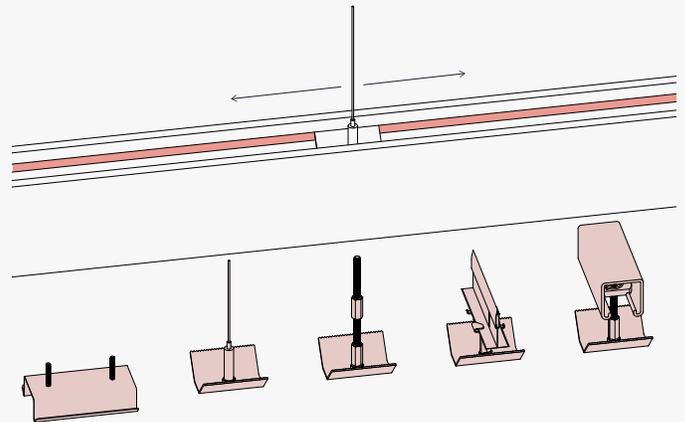

Our Key Features

SoftShapes® Tri brings a geometric form factor to acoustic control and design. These acoustic clouds, made of Soft Sound® material, are offered in a plethora of size options with the ability to specify different widths, lengths, and depth options, giving you complete design flexibility in any space. Install in tandem with other triangular Arktura modules such as TriSoft® for a multi-faceted acoustic cloud.

Reduce Noise & Enhance Acoustics

SoftShapes® Soft Sound® material reduces the impact of noise from everyday sonic discomforts such as outside noise, typing, and chatter, resulting in a more pleasant and productive environment. In addition, its material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

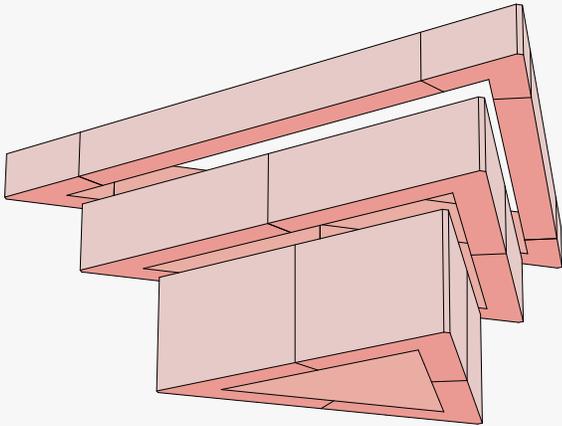

Adjustable & Flexible Attachments

Accommodate various plenum and site conditions thanks to adjustable drop locations and 5 available attachment methods, allowing installation ceilings or walls.

Our Key Features

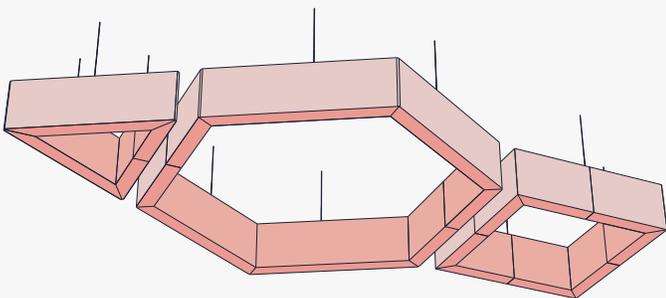

Profiles to Suit Your Needs

SoftShapes® offers a wide range of available sizes that can be configured to best suit your needs. For example, align multiple shapes adjacent to each other or stack modules of varying sizes.

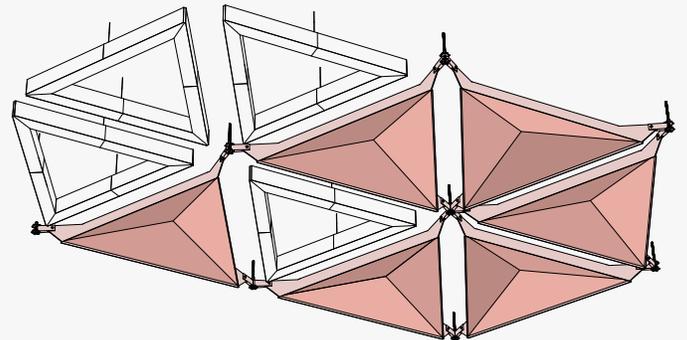

Expansive Soft Sound® Library

Choose from an extensive library of Soft Sound® colors and premium wood textures. Soft Sound® material provides impressive looks and top-quality sound attenuation.

Configure SoftShapes® in Creative Ways

SoftShapes® is available in various shapes, widths, and depth options, giving you complete design flexibility in any space. In addition, it can be mixed with other SoftShapes® modules to create new and exciting geometric systems for wall and ceiling installations.

Compatible with TriSoft®

Select SoftShapes® Tri modules are compatible with Arktura's TriSoft® modular acoustic cloud system. Use together to bring transformative design variation to any space.

Inspiration

Geometric configurations allow these modules to easily scale to fit any room

Multiple installation options spanning from wall to ceiling

Suspended clouds easily hide building infrastructure

1 Understand the System

Standard Configurations

SoftShapes® Tri modules are available in 40 different size configurations and 4 assembly types.*

3 Assembly Types: All Ship Flat Packed
(Corners included in Module Assembly)

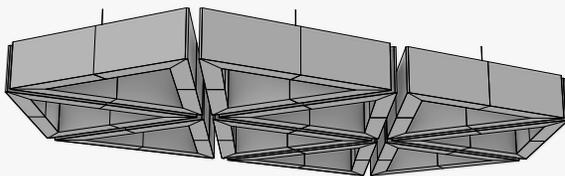

1 Assembly Type: Ships Pre-Assembled + Flat Packed
(Pre-Assembled Corner + Flat Packed Beams)

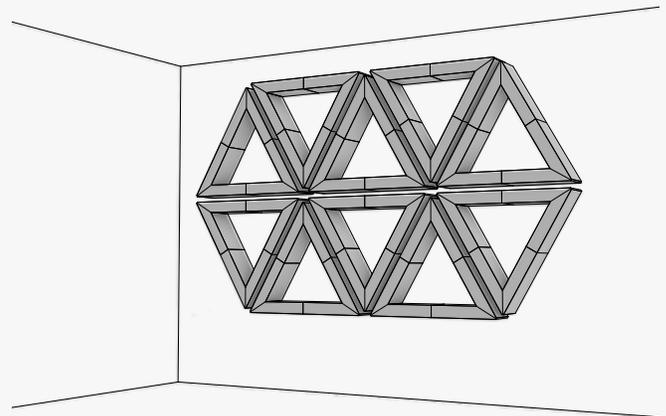

Multiple Modules

SoftShapes® may be installed in tandem with multiple modules to create new layouts, both in ceiling and wall applications.

Attachment Details

SoftShapes® modules feature adjustable drop locations on each side of the system, allowing it to adapt to various installation conditions.

🚫 Recommended Drop Points

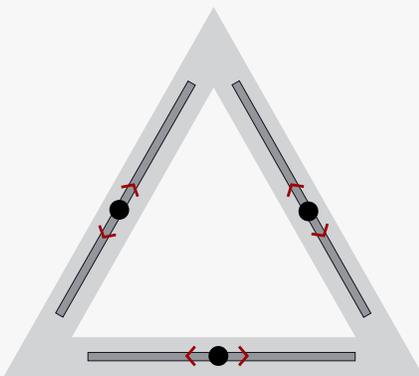

Modules smaller than 54" need 4 drop points.
(SoftShapes® Tri 36 shown.)

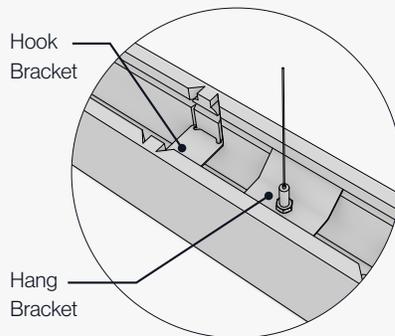

Modules bigger than 54" need 8 drop points.
(SoftShapes® Tri 72 shown.)

Adjustable Drop Locations

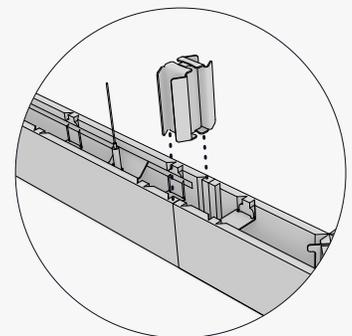

Check install manual for more info.

i As with natural wood, variation in color and grain is expected and grain will not align across panels.

! Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
