# ARKTURA x PURE+FREEFORM

Arktura and Pure + FreeForm have collaborated to offer designers and architects new, unique, premium finishes for Arktura's collection of standard panel systems.

These metallic patinas and wood textures are available to pair with a wide array of panel systems, including the biophilic, geometric, linear, and minimalist patterns across Arktura's Vapor®, Trace®, and Particle® lines and bespoke applications in Vapor® Graphic Perf® Adaptive system.

Experience the ideal blend of premium finishes and precision-perforated panels to elevate your commercial interior design with Arktura and Pure + FreeForm.

20 Year Limited Warranty

Refer to PURE+**FREEFORM** for warranty terms and conditions.

Cleaning & Maintenance

Cleaning Instructions:

Clean exposed surfaces with non-solvent-based, non-abrasive commercial neutral detergent and clean water. Wipe with soft towel or rag.

Additional Notes:

Panels should be stored flat and kept dry. To avoid corrosion, please do not remove panels from original packaging, until panels are in the installation space and ready to be installed.

Protective film should be removed immediately after installation.

The following acts should be avoided or excessive adhesion and surface degradation will occur:

• Direct exposure of protective film to sunlight; film must be shaded.

• Leaving protective film in contact with solvent or oil for an extended period.

• Exposing protective film to extremes in temperature.
