SoftGrid[®] Rosette

Ceiling **Baffles**

Our Key Features

Soft angles come together in precise harmony, bringing a delicate floral configuration to acoustic control. Multiple angled baffles combine to create SoftGrid® Rosette's unique form, reminiscent of its flora namesake, that adds a touch of elegance to any interior. Made from high-quality Soft Sound® material, this suspended cloud system is durable and mesmerizing, making it the right aesthetic choice for any renovation or new build.

Reduce Noise & Enhance Acoustics

SoftGrid®'s Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. SoftGrid®'s material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

Expansive Soft Sound® Library

Choose from a large library of Soft Sound® colors and wood textures. Mix and match colors to accent fins and complement the color scheme of your space.

Open Plan Accessibility

SoftGrid®'s open grid design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

Compatible with Hexagonal Systems

SoftGrid® Rosette's modules are compatible with other Hexagonal systems from Arktura including SoftGrid® Deca, SoftShapes™ Hex, and SoundStar® to fully immerse spaces in acoustic attenuation.

Field Modifiable

SoftGrid® modules can be trimmed down to a minimum of four fin intersections. By rearranging our adjustable hangers; we make it easy for you to specify standard modules that can be easily field-modified around anticipated or unforeseen site conditions during install.

Duo Capability

Add new dimensions of style, mix colors and textures in an expanding range of dynamic combinations to fully achieve your design intent. Perfect for incorporating branding or a dynamic two-tone impression.

Wood Texture**
Premium

i As with natural wood, variation in color and grain is expected and grain will not align across panels.

! Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
