Atmosphera® Rise

Ceiling **Baffles**

Fueling Possibilities®

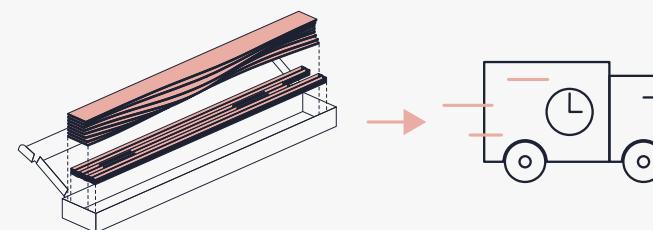

Our Key Features

Rise's ceiling baffles form a faceted series of geometric planes, its sharp angles keep your eye engaged along its path as it continues to cut back and forth peeling away new layers. But don't worry, the path is a quiet one thanks to the Soft Sound® fins which provide acoustic control to any space on Rise's trail.

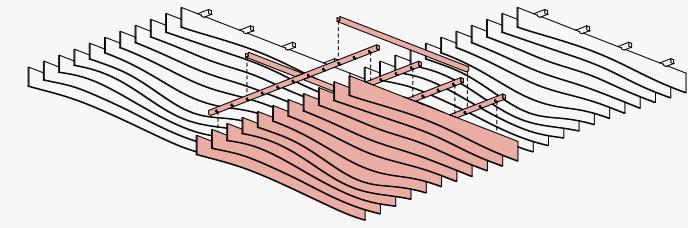

Reduce Noise & Enhance Acoustics

Atmosphera®'s Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. Atmosphera®'s material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

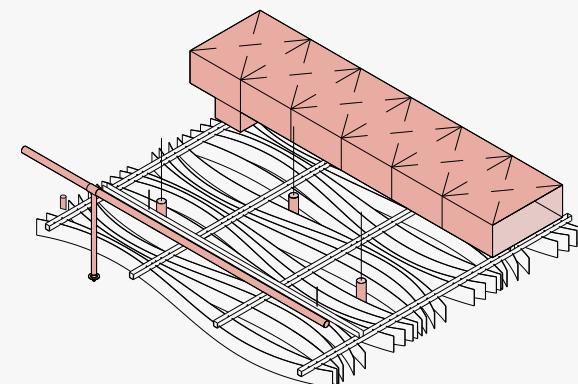

Faster Shipping & Installation

Because they're preconfigured, production starts as soon as you order. Once complete Atmosphera®'s easy-to-assemble modules are promptly shipped, helping you cut down installation times and meet your project deadlines.

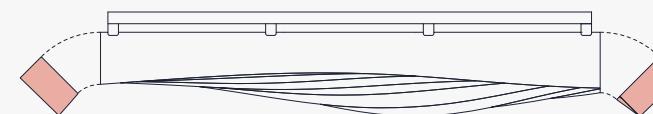

Preconfigured Designs & Sizes

For a custom look without the custom price tag, pre-configured Atmosphera® modules offer innovative design impact with a quick and easy installation process. Achieve a cleaner design in a fraction of the time versus independently hung baffles.

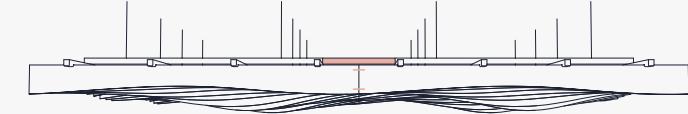

Open Accessibility in Plan

Atmosphera®'s open design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

Easily Field Modifiable

This system allows for some simple modification that can allow it to adapt to your space without having to design a custom system.

Continuous Straight Baffles

Utilizing a hidden fin and frame alignment system Atmosphera provides continuity in all directions across your space. Our custom formulated material thickness and density ensures rigidity that limits deflection.

3 Product Specifications

1 Understanding the System

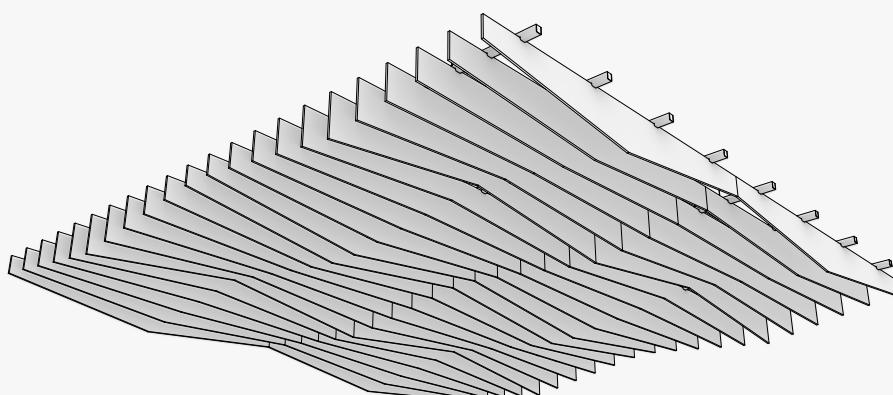

Standard Module

Modules consist of fins made from Arktura's lightweight & durable Soft Sound® acoustical material supported by stainless steel ribs.

Multiple Modules

Modules can be seamlessly tiled in multiple directions in plan.

⚠ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

3 Product Specifications & Certifications

System Specs

Dimensions (WxLxD)	7'-6" x 7'-6" x 10 7/8"
Fin Material	12mm Soft Sound® (PET)
Frame Material	Steel
Openness in Plan	86%
Fire Rating	ASTM E84 - Class A
Attachment Method	3/8" Threaded Rod (By Others)
Accessibility	Yes, removable Clips at Each Fin
Trimmability	Yes, per installation manual

Product Line

Design Options

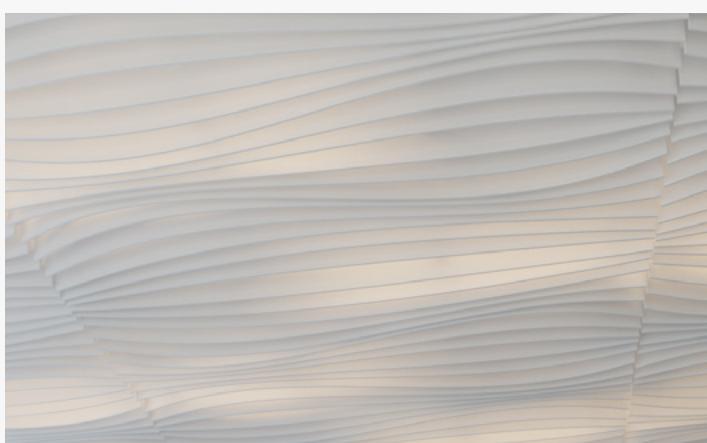

Atmosphera® builds on Arktura's experience designing and manufacturing custom solutions to deliver a dynamic, scalable, and affordable family of modular ceiling systems. Choose from linear, organic, and faceted designs, available in a wide range of colors.
