---

Ceiling **Baffles**

*Fueling Possibilities®*

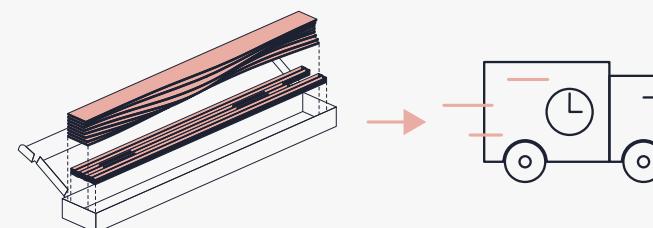

# Our Key Features

Surf's ceiling baffles bring the active undulation of waves into your design activating your space and its occupants. Visitors might feel as if they were ready to head out for an afternoon surfing adventure. And because of their Soft Sound® fins, standing under the panels is tranquil, as their acoustic sound control limits excess noise.

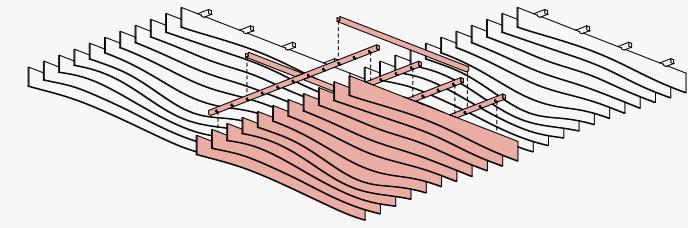

## Reduce Noise & Enhance Acoustics

Atmosphera®'s Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. Atmosphera®'s material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

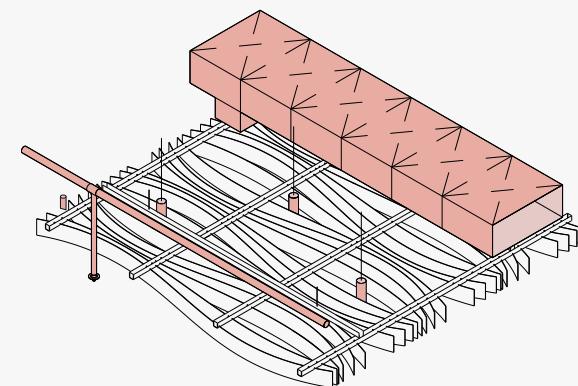

## Faster Shipping & Installation

Because they're preconfigured, production starts as soon as you order. Once complete Atmosphera®'s easy-to-assemble modules are promptly shipped, helping you cut down installation times and meet your project deadlines.

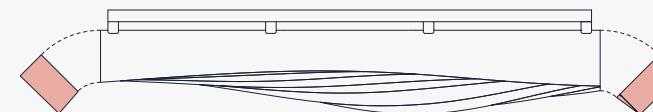

## Preconfigured Designs & Sizes

For a custom look without the custom price tag, pre-configured Atmosphera® modules offer innovative design impact with a quick and easy installation process. Achieve a cleaner design in a fraction of the time versus independently hung baffles.

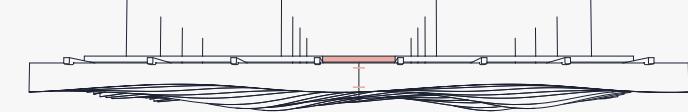

## Open Accessibility in Plan

Atmosphera®'s open design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

## Easily Field Modifiable

This system allows for some simple modification that can allow it to adapt to your space without having to design a custom system.

## Continuous Straight Baffles

Utilizing a hidden fin and frame alignment system Atmosphera provides continuity in all directions across your space. Our custom formulated material thickness and density ensures rigidity that limits deflection.

3 Product Specifications

## 1 Understanding the System

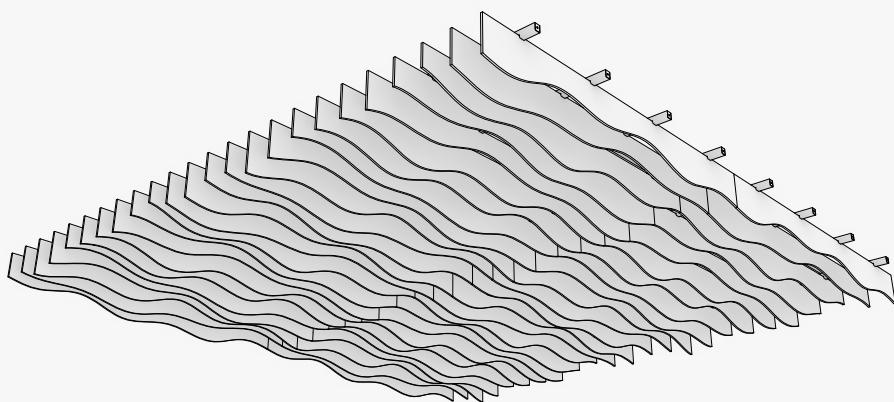

### Standard Module

Modules consist of fins made from Arktura's lightweight & durable Soft Sound® acoustical material supported by stainless steel ribs.

### Multiple Modules

Modules can be seamlessly tiled in multiple directions in plan.

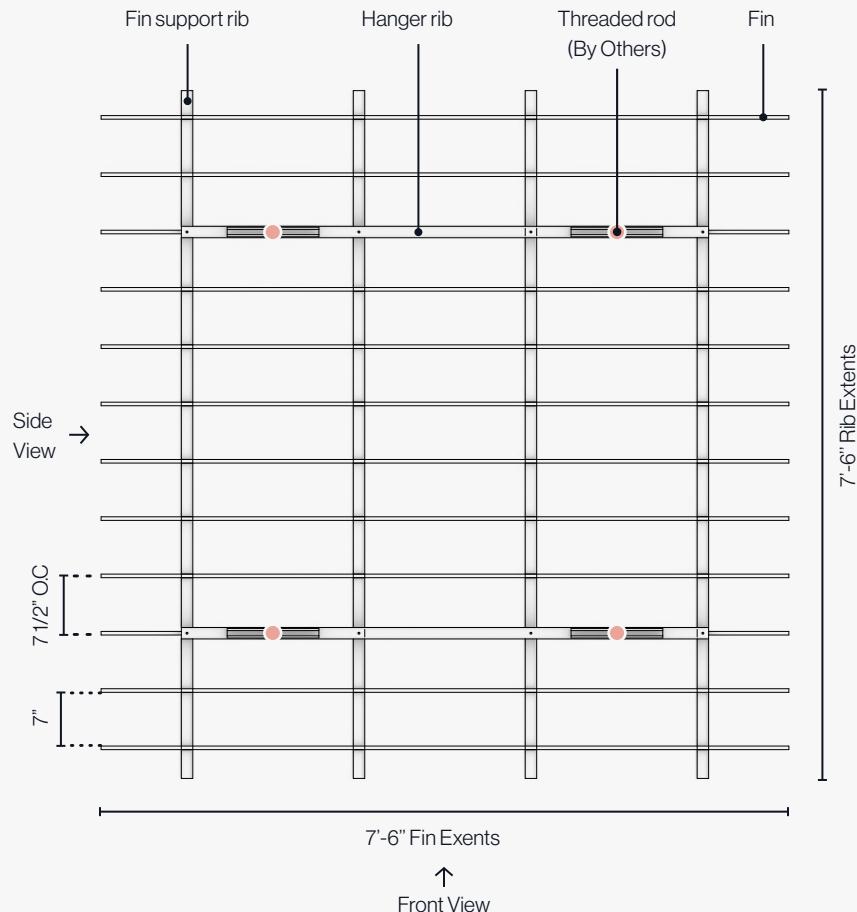

## 1 Understanding the System

### Understanding the Module

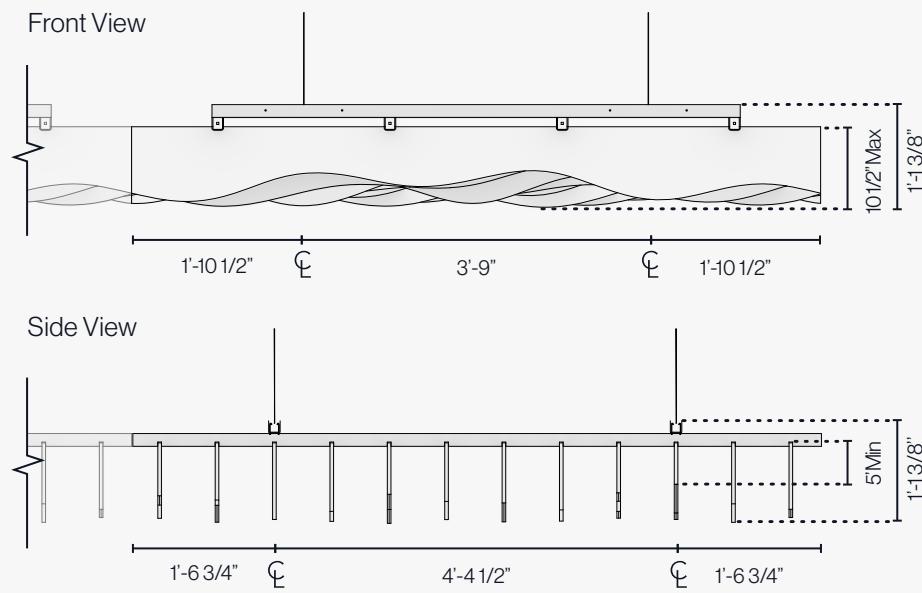

#### Plan

Atmosphera® Surf lets you design linear layouts in plan. Create seamless designs for your desired look while adapting to and concealing building elements such as sensors, sprinklers, and lighting.

86% Open in Plan

Azalea

Sorbet

Buttercream

Blush

#### Soft Sound®

#### Elementals

Standard

Ube

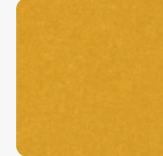

Baltic

Caspian

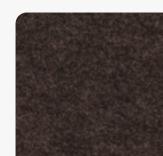

Cortez

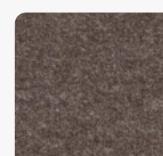

Honey

Sienna

Truffle

Morel

Cypress

Pebble

⚠ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

## ② Available Finishes

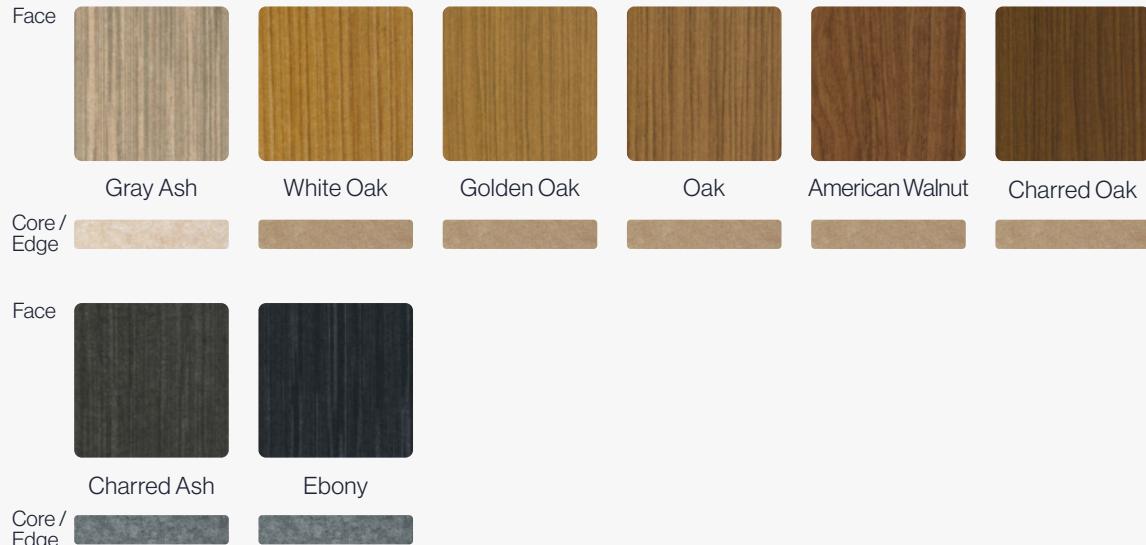

### Baffle Color

**Soft Sound®  
Essentials**  
Standard

**Soft Sound®  
Wood Texture**  
Premium

As with natural wood, variation in color and grain is expected and grain will not align across panels.

Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color.
