Graphic Perf[®] Interior

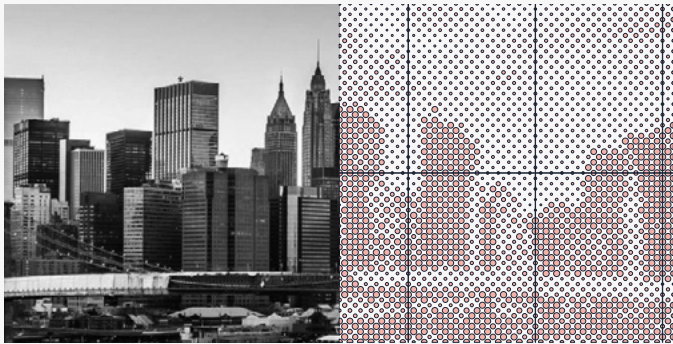

Ceiling, Wall, Railing, & Cladding Panels

by Solutions Studio[®]

Fueling Possibilities[®]

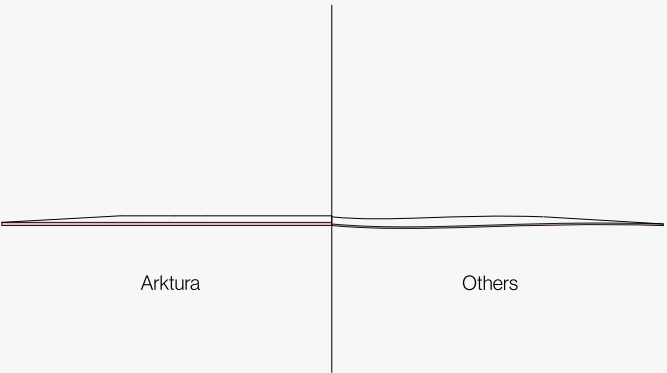

Our Key Features

If you’ve ever wished that perforated panels could be something more, consider your wish granted. Our Scripted & Photoreal custom products are perforated panels that can be customized to create any design or image you can dream up, whether it’s branding, a photo or custom graphic. Work with an Arktura expert to create a one-of-a-kind look that is sure to set you, and your design, apart from the crowd. And then add optional backlighting for a beautiful glow or our Soft Sound® backer for acoustic control.

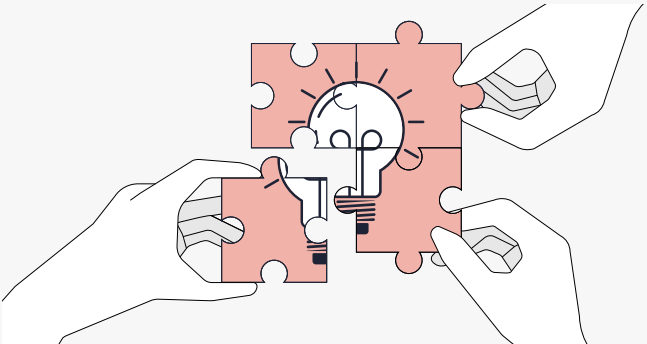

Customizable System

Apply your creative vision to a standard system. We turn your image or custom pattern into easy-to-install perforated panels to create your desired effect across walls and ceilings.

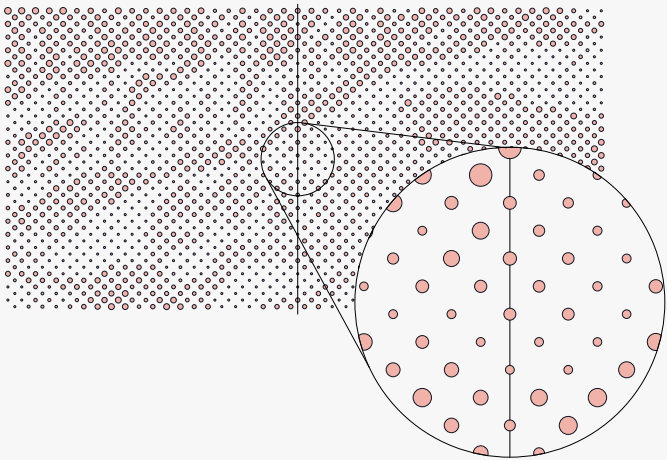

Superior Flatness & Durability

Graphic Perf® panels may be composed in 3/16” or 1/2” thickness, which, in combination with our precision processes, results in unrivaled flatness and performance.

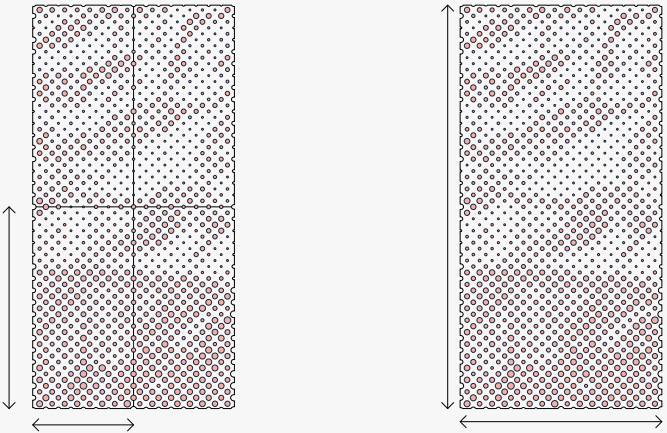

Collaborative Process

Our project managers translate your goals and design opportunities into a precise workflow. We factor in all base building criteria, then produce detailed software-generated shop drawings to guide our precision manufacturing.

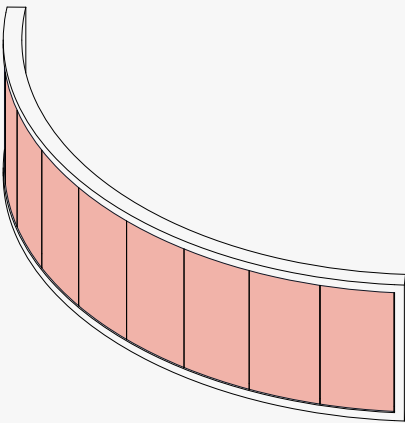

Continuous Pattern Aesthetic

Achieve uninterrupted patterning across your space. Graphic Perf® perforations bridge the seams between panels, resulting in a continuous pattern or graphic.

Larger Panel Sizes

With a range in panel sizing, Graphic Perf® allows for larger panel specification resulting in fewer seams and lower installation time.

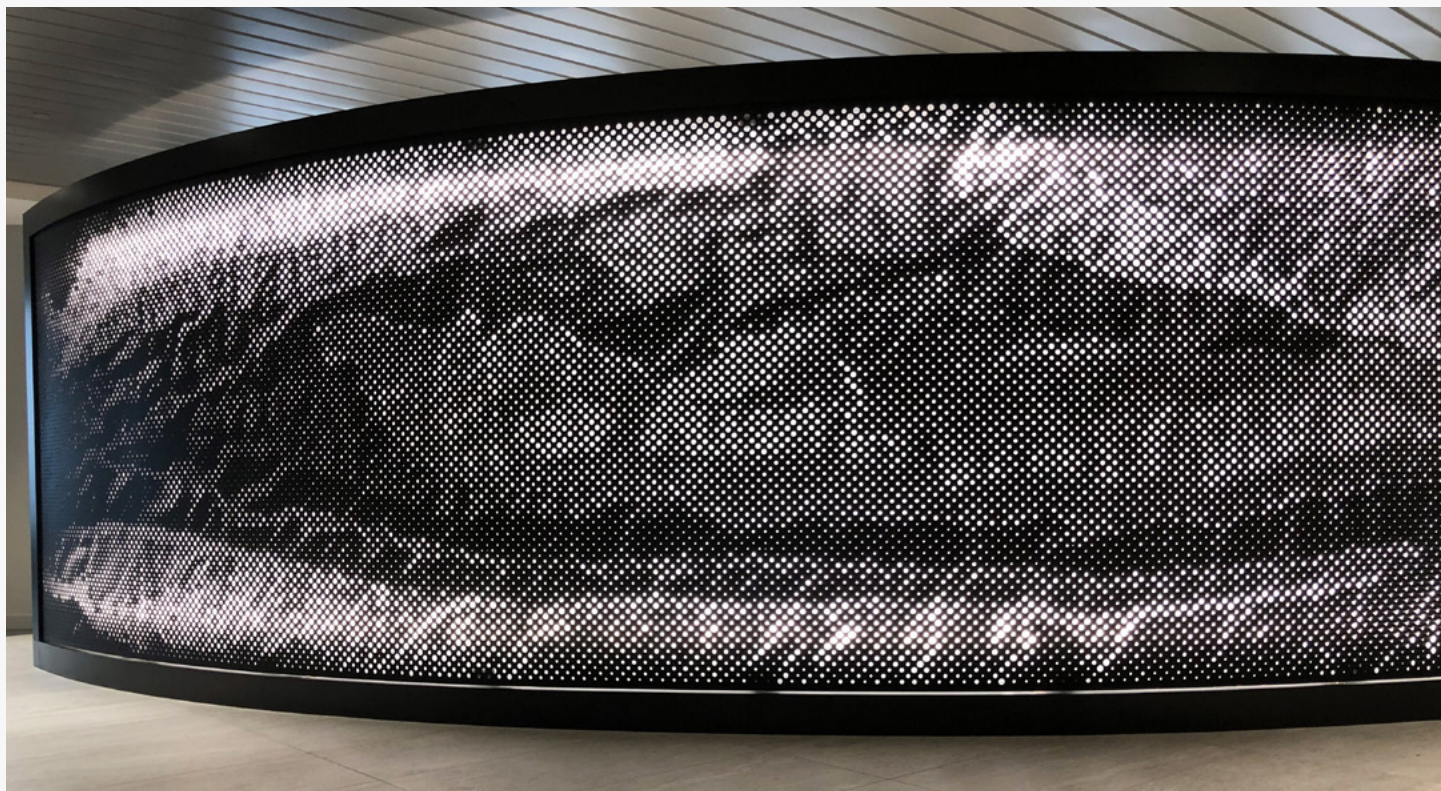

Ability to Curve Panels

Graphic Perf® panels can be rolled to result in smoothed, radiused applications. Curves may be tailored to adapt to almost any architectural design.

Inspiration

Graphic Perf® Adapts to the Geometry of Your Space

Translate Your Imagery to Perforated Panels

Design Your Own Scripted Patterns

Applications

Column Cladding

Transform columns into a canvas through distinctive cladding that enhances aesthetics and unifies spaces while masking structural elements.

Guardrails

Build beautiful custom guardrails that address form and function seamlessly, introducing unique perforated patterning that flows through your space.

Curved Panel

Map your perforated design across curved panels, manufactured to flow organically within your configuration and design demands.

Clear Span Panels / Partitions

Create panels and partitions that span continuously from wall to ceiling in any space.

Applications

Operable/Sliding Walls

Use Graphic Perf® to create one of a kind operable walls that suit your space's demands and transform your choice of imagery or patterning into structural solutions.

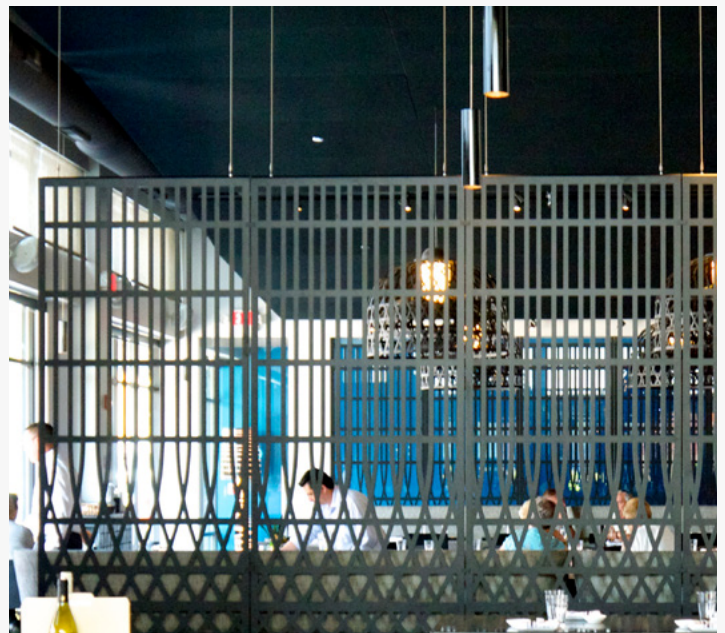

Building Integration Masking

Easily mask structural elements, HVAC, and other unsightly building infrastructure by utilizing Graphic Perf®'s various ceiling and wall applications.

Illuminated Walls & Ceilings

Integrate even, energy-efficient illumination into ceilings and walls. Choose from various color temperatures, or select DMX controllable RGB LED options. The possibilities are endless.

Suspended Walls

Design unparalleled suspended panels that establish clear separation without visual obstructions.

Overview

- 2 Graphic Perf® Process
- 3 Case Studies
- 4 Optional Accessories
- 5 Available Finishes
- 6 Product Specifications
- 7 Available Pattern Solutions

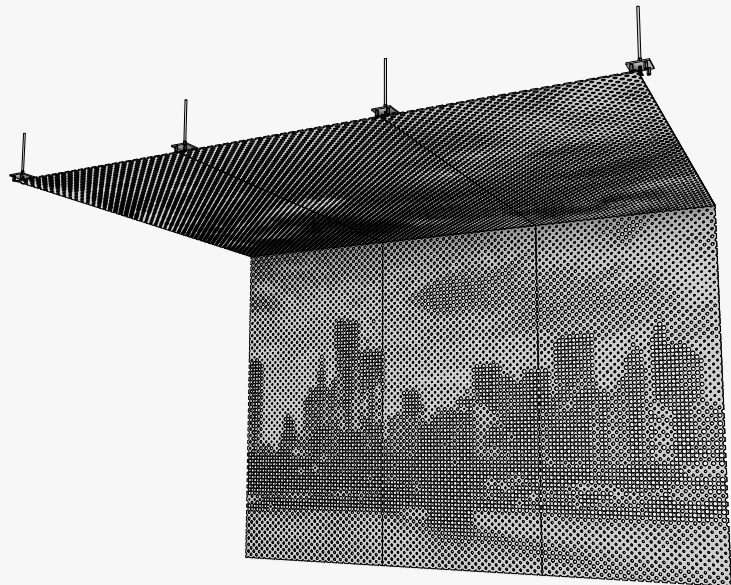

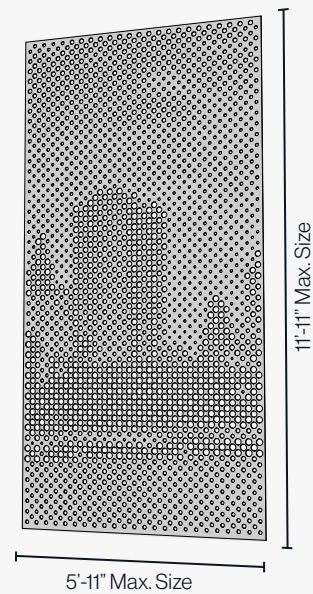

1 Understanding the System

Graphic Perf® Panel

Graphic Perf® converts your design or image across metal panels.

Flexible Across Walls & Ceilings

Graphic Perf® works equally well across walls or ceilings and allows for seamless continuity of imagery and pattern across transition points.

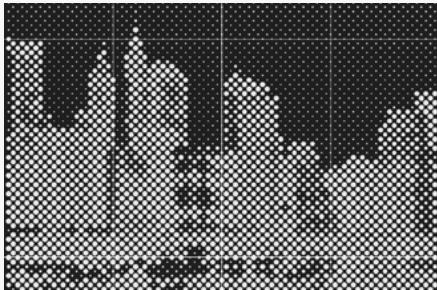

2 Graphic Perf® Process

Option A: Photoreal

Your Image

The Graphic Perf® process starts with your image. Select the photo, logo, or graphic you want translated to metal. Inquire about available scripted options.

Translation

Our proprietary software help translate your image into pattern, spanning across panels to fit your desired space, and the needs of your project.

Perforation

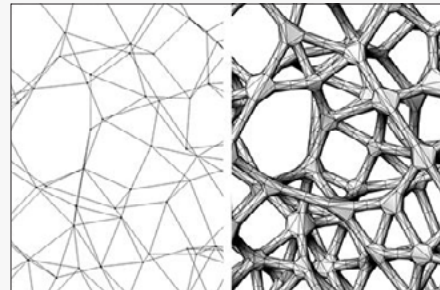

We use state-of-the-art tools and techniques to precision manufacture seamlessly tileable grid compatible panels that bring your image to life.

Option B: Scripted

Inspiration

You provide the reference, be it an image or sketch.

Computer Generated Artwork

Our software allows for a multitude of options to individually design each shape, perforation, and opening of your artwork.

Perforation

We use state-of-the-art tools and techniques to precision manufacture seamlessly tileable grid compatible panels.

3^a Case Studies - Newmont Goldcorp

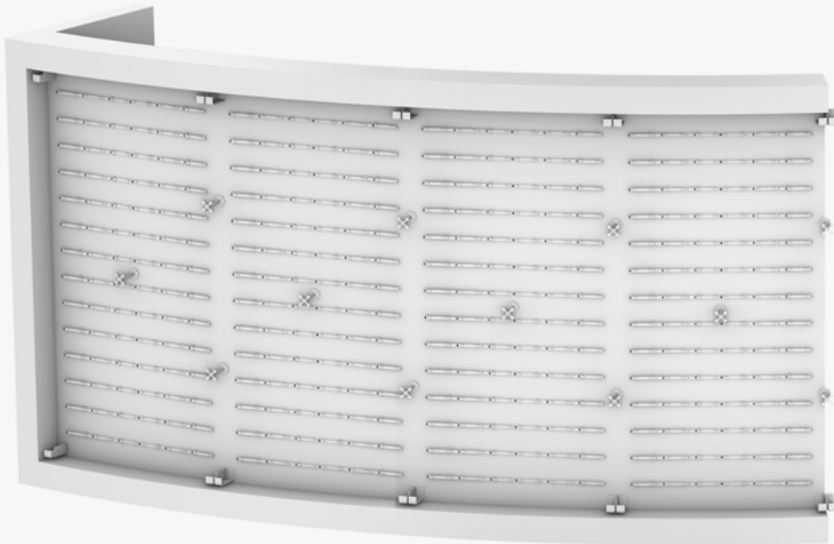

Curved Photo Inspired Paneling

Newmont Goldcorp's office was designed by Group5 design with a focus on encouraging collaboration between employees. The curved backlit panels created by Arktura's Graphic Perf® Photoreal custom system allows for an open yet separate partition between client reception and the staff lounge.

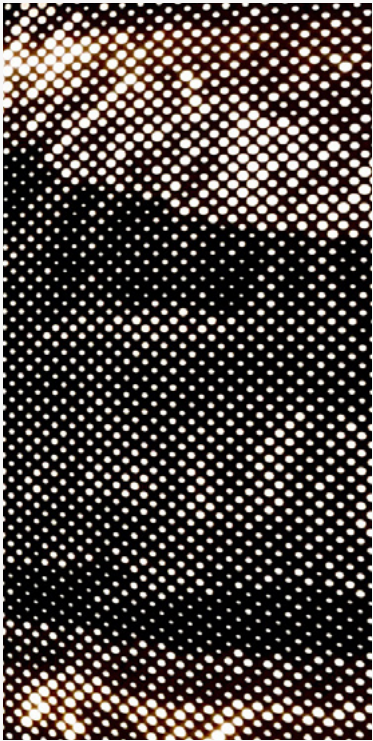

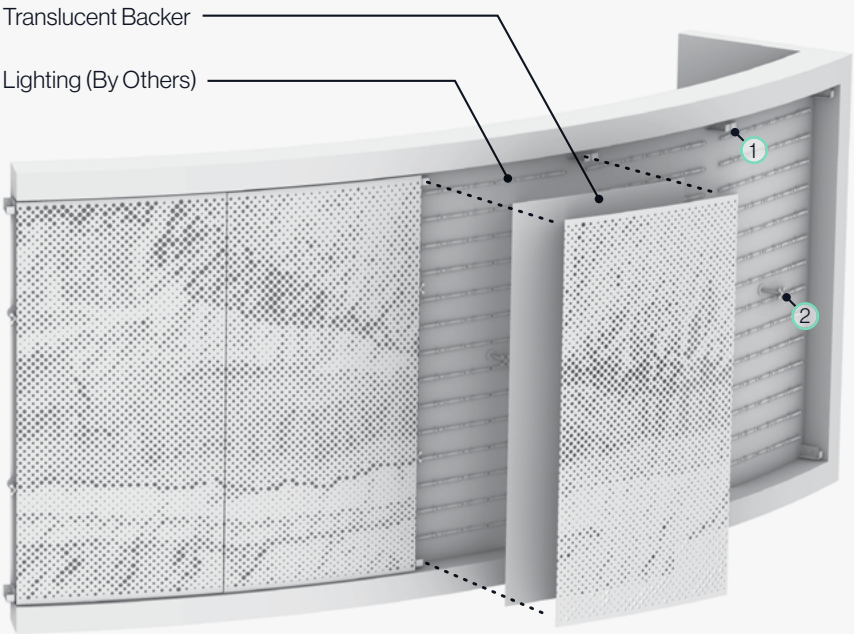

3rd Party Backlighting Solution

While Arktura offers its own integrated backlighting solutions, this project highlights the flexibility of Graphic Perf® to work with 3rd party illumination.

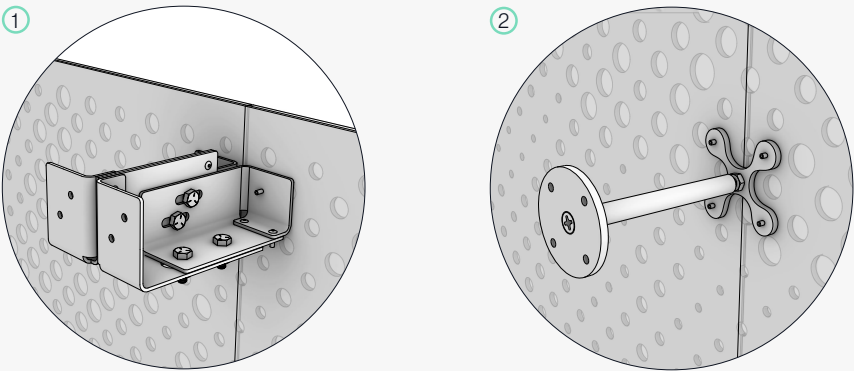

Gauging the Curve

Graphic Perf® is adaptable to various gauges of metal to achieve a range of curvatures required by your project. In this case study Arktura cost effectively designed the panel pieces to establish a minimal bend radius that allowed the curvature to be achieved with minor modifications to the panel. This was made possible by considerations in Alloy, Gauge, and Panel Size, and standoff attachments.

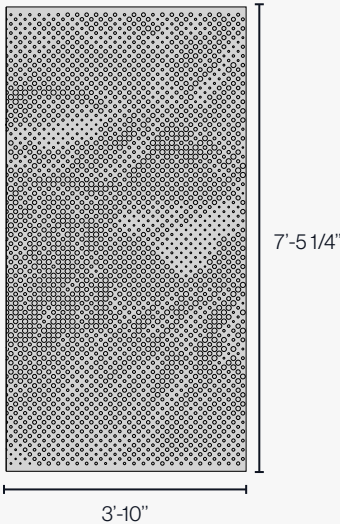

Flexible Attachments

The unique standoff attachments were designed to accommodate the cavity depth required to house components provided by outside supplier of backlight system.

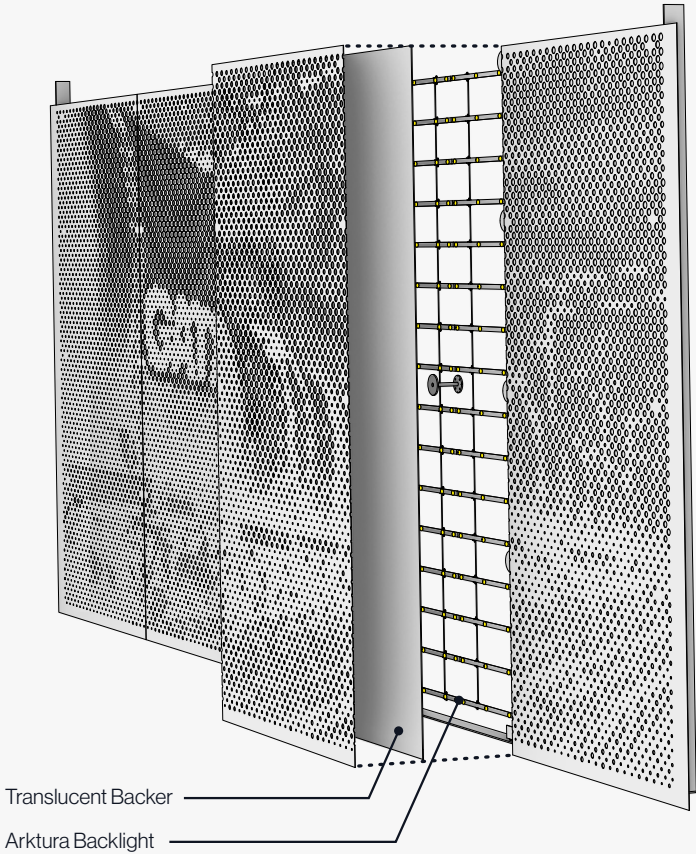

Two Standoff Methods designed to maximize support and prevent obstruction of perforations.

3^b Case Studies - GATX

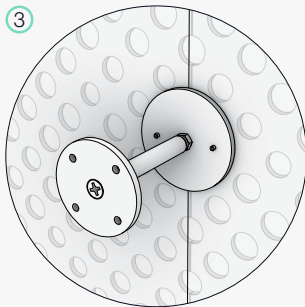

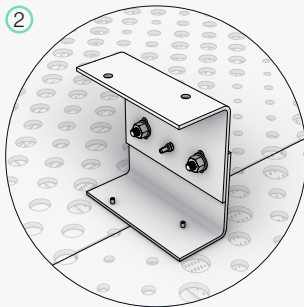

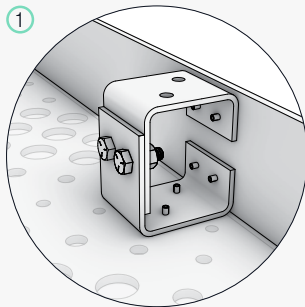

Perforated Passage

PBD's design focused on industrial materials to celebrate GATX's history as a global railcar leader. Utilizing Graphic Perf® Photoreal and Arktura Backlighting resulted in a sophisticated aesthetic and furthered the ability to incorporate branded elements throughout the ceiling and wall system.

Flexible Attachments

Utilizing a unique combination of Standoff Attachment brackets designed to accommodate cavity depth requirements specified to house lighting by others, or Arktura Backlighting ensures non obstruction of pattern and engineering stamp for the components by Arktura.

Three Attachment Methods designed to maximize support and prevent obstruction of perforations.

Attachment Method

Our advanced manufacturing technology allows for infinite variations in hole size, which preserves the clarity of the input image. The combination of Arktura Backlighting, and a Frosted Transparent Backer behind each panel brings the photo to reality through illumination.

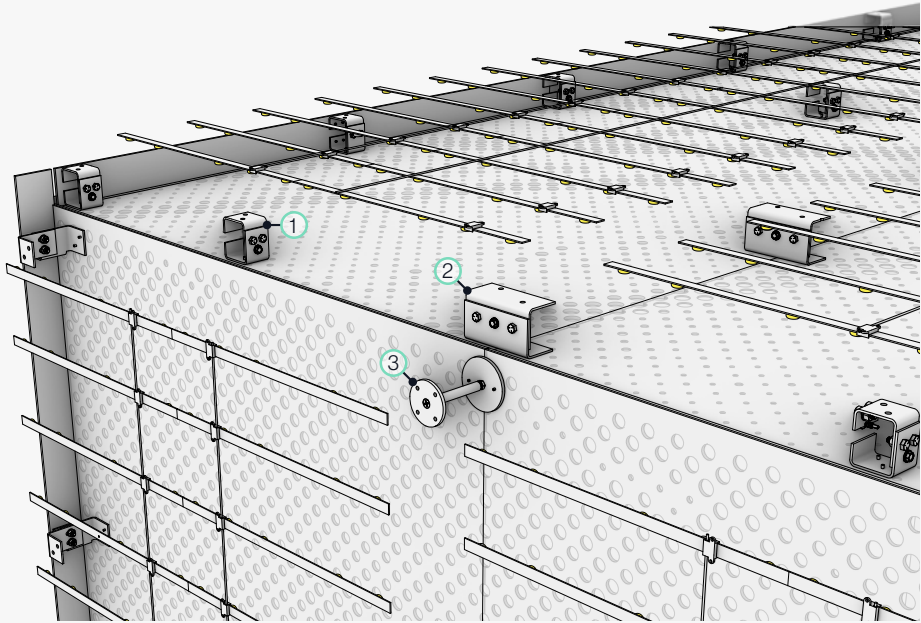

Photo Inspired Paneling

Our proprietary software tools translate images into a pattern of holes, sized and distributed to reproduce exactly the gradations of light and dark.

3^o Case Studies - Confidential Client

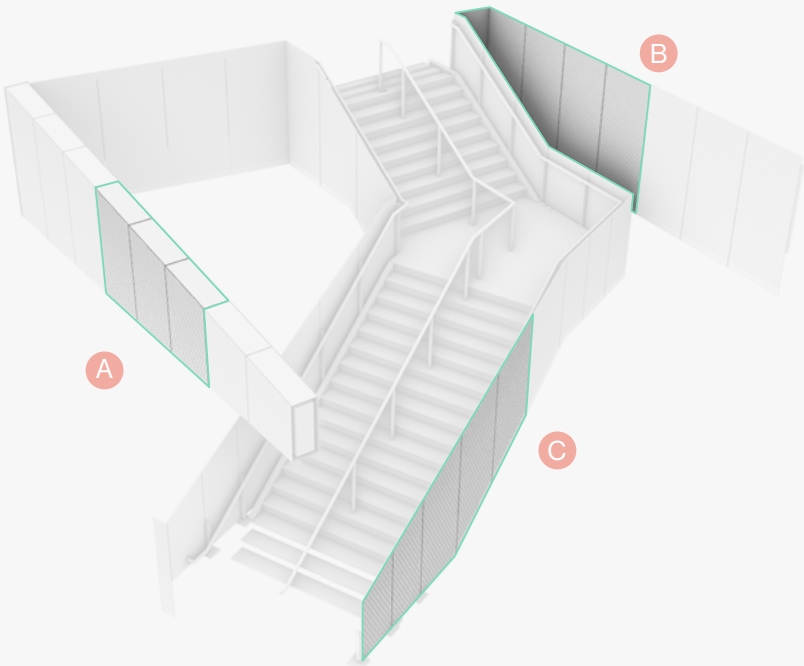

Scripted Cladding and Guardrails

The office renovation by Gensler for a confidential technology client focused on creating a human-centric and agile workspace, designed around human movement patterns. The stair guardrails and beam cladding designed with Arktura's Graphic Perf® Scripted create a point of orientation in the flow of social engagement within the structure.

Three System Types for One Solution

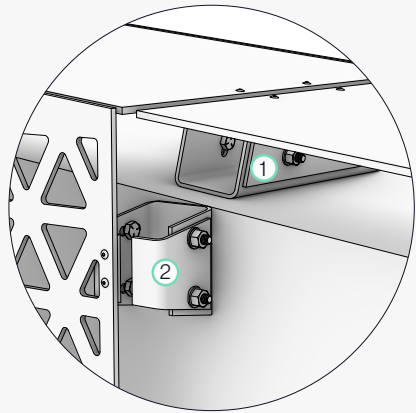

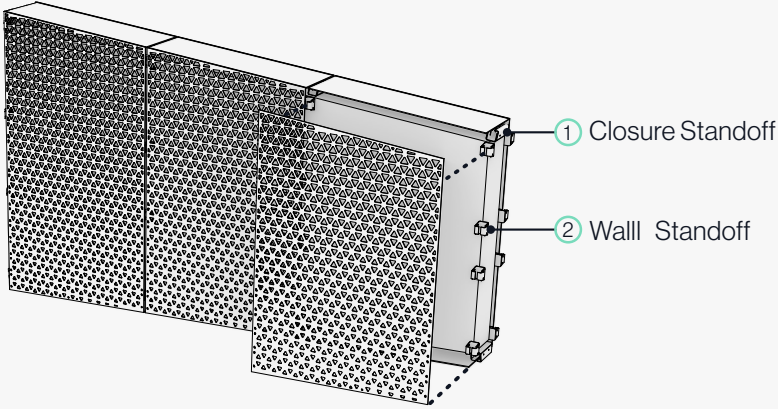

Through proprietary scripted pattern technology Arktura was able to generate seamless pattern aesthetic across cladding, guardrails, and stair railings to create a uniform structure combining three systems.

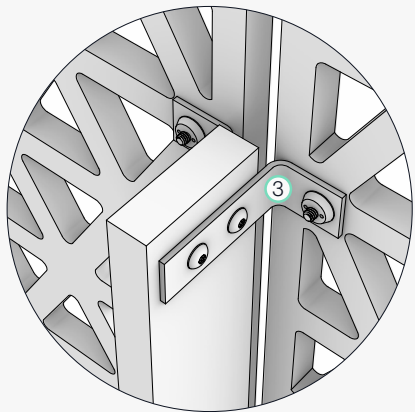

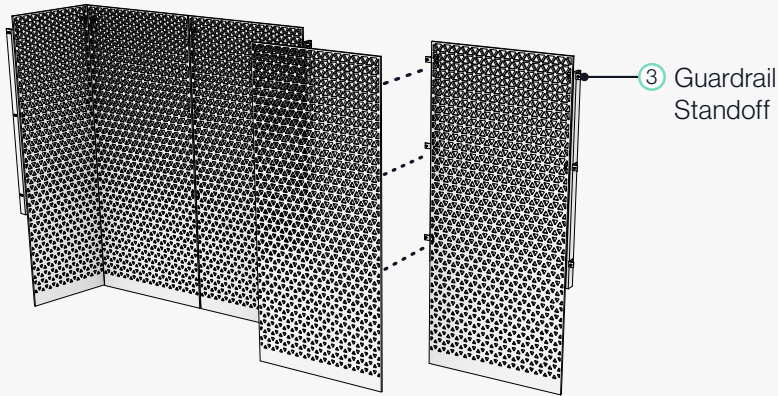

System Attachment Details

This case study utilizes three varying types of standoffs to meet specific engineering requirements- Wall, Closure, and Railing. Arktura's Project Manager will work in tandem with engineer and architect of record to meet & optimize design intent to minimize visibility of standoff and maximize the seamless nature of the scripted pattern.

4 Optional Accessories

Lighting

Backlighting

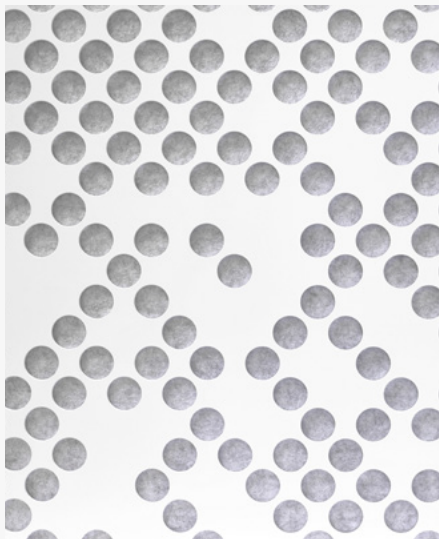

Arkтура Backlighting allows you to fully illuminate your ceiling and wall panel installs, creating beautiful evenly lit surfaces. These fixtures are available in high and low output versions, both dimmable.

RGB Lighting

Arkтура offers RGB Backlighting that can be tailored to your design vision, with available programmatic animation, to bring your project to life.

Backers

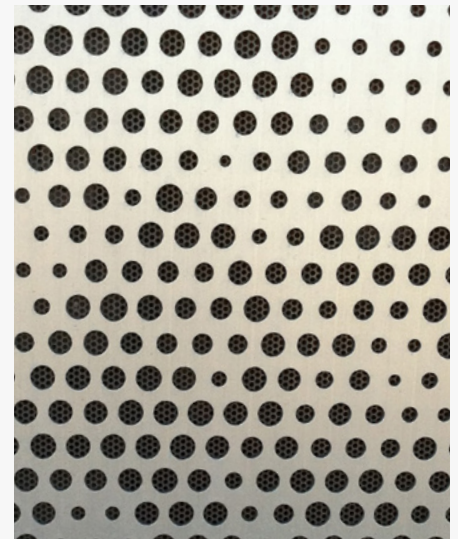

Soft Sound® Backer

Using our Soft Sound® backers, you can achieve a variety of NRC ratings.

Translucent Backer

Our proprietary light diffusing backers can be used to create a functional or decorative lighting effect in any space.

Mesh Backer

Use available mesh backers to create another layer of depth while further masking substructures.

 Illustrative diagrams. Perforations will be custom to your design.

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

6 Product Specifications & Certifications

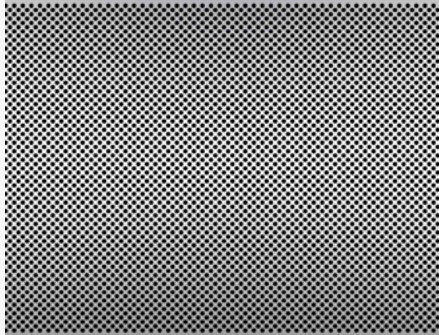

System Specs

Panel Size (WxH)	5'-11" by 11'-11" Max (Panel Size Max is nominal & varies depending on application and attachment method of system specification)
Material	Aluminum or Steel
Openness in Plan	Varies by design
Fire Rating	Non-Combustible
Ceiling Attachment	Hanging Bracket (Included) and Threaded Rod (By Others)
Wall Attachment	Steel, and polycarbonate standoffs
Accessibility	Optional
Accessories	Frosted backer, Backlight, RGB Backlight, Soft Sound® Backer
