

ARKTURA

# Vapor® Cora

---

Ceiling & Wall Panels

*Fueling Possibilities®*

# Our Key Features

Don't settle for standard. Cora aluminum torsion spring panels reimagine a timeless pattern. By adding scattered solid forms to the diamond grid, you get a modern take on a classic look that is sure to turn heads. However, if your design still needs more energy, try adding our optional integrated lighting or our Soft Sound® backers for extra acoustic comfort.

## Reduce Noise & Enhance Acoustics

Vapor®'s optional Soft Sound® backer material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. The Soft Sound® backer works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

## Superior Flatness & Strength

Vapor® panels are manufactured from aluminum that is on average 50% thicker than the competition, which in combination with our precision processes result in unrivaled flatness.

## Easy Installation & Access

Vapor® panels offer easy install, using quick torsion spring attachment across standard ceiling grid systems or simple wall attachment using our Vertika® channel system.

## Preconfigured Solutions

Vapor® panels are scalable, seamlessly tileable preconfigured solutions designed with a dynamic array of criteria and effects in mind. Choose from our growing library of patterns to uniquely impact your project.

## Integrated Lighting Options

Arktura's Vapor® line makes it easy to seamlessly add illumination and lighting effects to your projects, through available integrated InLine and Backlighting options.

## Continuous Pattern Aesthetic

Achieve uninterrupted patterning across your space. Vapor® patterns have perforations that wrap around the edges of each panel, concealing where patterns start and end.

4 Product Specifications

## 1 Understanding the System

### Standard Panel

Vapor® is a modular accessible aluminum panel system designed to work with torsion grid. Customization is available.

### Seamlessly Join Walls & Ceilings

Vapor® easily transitions from one plane to another and around corners.

## 1 Understanding the System

### Understanding the Panel

The pattern surface is created by seamlessly tiling across your space.

Panel A: 66% Open

\* Vertika® Trim

### Ceiling Section

### Panel Configuration, Wall or Ceiling

#### Wall Section

! All dimensions nominal.

## 1 Understanding the System

### Accessory Options - Ceiling

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine downlight

 Check out our Configuration examples on PAGE 10.

\* A Specific Inline light panel is used to accomodate the width of the fixture within the 2' width.

### Torsion Spring Adapter Clip

Interested in using standard t-grid?  
Use our optional Torsion Spring Adapter Clip.

### Attachment System - Ceiling

Torsion Spring clips allow for rapid install and easy access for maintenance above the grid post install.

## 1 Understanding the System

### Accessory Options - Wall

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine light

 Check out our Configuration examples on PAGE 10.

\* A Specific InLine light panel is used to accomodate the width of the fixture within the 2' width.

### Attachment System - Wall

Panels are easily installed or removed by sliding onto or lifting off from the system's Vertika® channel hooks.

## 2 Optional Accessories

### Lighting

### Backlighting

Arktura Backlighting allows you to fully illuminate your ceiling and wall panel installs, creating beautiful evenly lit surfaces. These fixtures are available in high and low output versions, both dimmable. See Backlighting specs details on PAGE 15.

### InLine Lighting

Our InLine Light sits flush with the face of the panels while conveniently attaching to the bottom of the grid. The fixture is available in 4' and 8' lengths. A special side-light Vapor® panel allows the light to straddle its 4' edge while staying within a 24" overall width. See InLine Lighting specs details on PAGE 17.

### Backers

### Acoustic Backer

We offer various options of Soft Sound® panel inserts to achieve a variety of NRC ratings. Please refer to our True NRC® table of ratings.

### Translucent Backer

Our proprietary light diffusing backers can be used to create a functional or decorative lighting effect in any space.

⚠ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

3150	0.93
4000	0.95
5000	0.97

## Test Arrangements

Most popular application highlighted green.

### E300 Mounting Type - Ceiling - NRC: 0.90

In this mounting type, the specimen is an array of spaced sound absorbing panels suspended from a T-Grid system approximately 300mm (11.8") above the horizontal test surface, measured from the face of the panel. This approximates the mounting method of a typical ceiling panel installation. Panels were evenly distributed in a 2x4 arrangement 1/16" apart in all directions.

### F70 Mounting Type - Wall - NRC: 0.75

In this mounting type, the specimen is separated from the horizontal test surface 70mm (2.87") from the back of the panel with spacers. This is intended to simulate normal use of the product with the Vertika® wall mount system.

### F150 Mounting Type (Soft Sound® Material Only) - NRC: 0.90

In this mounting type, the specimen is separated from the horizontal test surface 150mm (5.90") from the back of the panel with spacers. This is intended to simulate the raw material using spacers or spacing clips.

**(i)** Acoustic performance can vary widely based on how a product is mounted. Learn more about acoustic performance and how NRC is calculated at True NRC®. Testing was conducted through Intertek, Lake Forest, CA per ASTM C423.

**True NRC®: 0.90**

SAA: 0.89

TESTING  
ASTM C423

## Definitions

**Sound Absorption Coefficient** describes the fraction of the incident sound energy that a material absorbs. Theoretically it can vary from 0 (no energy absorbed) to 1.0 (perfect absorption with all incident sound energy absorbed.)

**NRC (Noise Reduction Coefficient)** rating is the average of the sound absorption coefficients at 250, 500, 1000 and 2000 hertz. The average is rounded to the nearest multiple of 0.05.

**SAA (Sound Absorption Average)** rating is the average of the sound absorption coefficients at an octave range of 12 frequencies ranging from 200 to 2500 hertz. The average is rounded to the nearest multiple of 0.01.
