Vapor[®] Frequency

Ceiling & Wall **Panels**

Our Key Features

Vapor® Frequency powder-coated aluminum torsion spring panels bring the digital world into reality. With a design that starts off intense and fades away, you can create a path for people to follow, while reducing the sound of their steps thanks to our Soft Sound® backer. Or add our integrated lighting backer to take the digital feel to another level.

Reduce Noise & Enhance Acoustics

Vapor®'s optional Soft Sound® backer material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. The Soft Sound® backer works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

Superior Flatness & Strength

Vapor® panels are manufactured from aluminum that is on average 50% thicker than the competition, which in combination with our precision processes result in unrivaled flatness.

Integrated Lighting Options

Arktura's Vapor® line makes it easy to seamlessly add illumination and lighting effects to your projects, through available integrated InLine and Backlighting options.

Easy Installation & Access

Vapor® panels offer easy install, using quick torsion spring attachment across standard ceiling grid systems or simple wall attachment using our Vertika® channel system.

Preconfigured Solutions

Vapor® panels are scalable, seamlessly tileable preconfigured solutions designed with a dynamic array of criteria and effects in mind. Choose from our growing library of patterns to uniquely impact your project.

Continuous Pattern Aesthetic

Achieve uninterrupted patterning across your space. Vapor® patterns have perforations that wrap around the edges of each panel, concealing where patterns start and end.

Overview

- 1 Understanding the System
- 2 Optional Accessories
- 3 Available Finishes
- 4 Product Specifications

1 Understanding the System

Standard Panel

Vapor® is a modular accessible aluminum panel system designed to work with torsion grid. Customization is available.

Seamlessly Join Walls & Ceilings

Vapor® easily transitions from one plane to another and around corners.

1 Understanding the System

Understanding the Panel

The pattern surface is created using 4 unique tiles in a specific arrangement that minimizes visual repetition across your space. Vapor® Frequency is also compatible with Vapor® Trail, expanding your design options.

Panel A: 3% Open
 Panel B: 4% Open
 Panel C: 17% Open
 Panel D: 18% Open

Panel Configuration, Wall or Ceiling

1 Understanding the System

Accessory Options - Ceiling

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine downlight

i Check out our Configuration examples on PAGE 10.

* A Specific Inline light panel is used to accommodate the width of the fixture within the 2' width.

Torsion Spring Adapter Clip

Interested in using standard t-grid? Use our optional Torsion Spring Adapter Clip.

Attachment System - Ceiling

Torsion Spring clips allow for rapid install and easy access for maintenance above the grid post install.

1 Understanding the System

Accessory Options - Wall

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine light

 Check out our Configuration examples on PAGE 10.

* A Specific InLine light panel is used to accommodate the width of the fixture within the 2' width.

Attachment System - Wall

Panels are easily installed or removed by sliding onto or lifting off from the system's Vertika® channel hooks.

2

Optional Accessories

Lighting

**Backlighting**

Arkтура Backlighting allows you to fully illuminate your ceiling and wall panel installs, creating beautiful evenly lit surfaces. These fixtures are available in high and low output versions, both dimmable. See Backlighting specs details on PAGE 15.

**InLine Lighting**

Our InLine Light sits flush with the face of the panels while conveniently attaching to the bottom of the grid. The fixture is available in 4' and 8' lengths. A special side-light Vapor® panel allows the light to straddle its 4' edge while staying within a 24" overall width. See Inline Lighting specs details on PAGE 17.

Backers

**Acoustic Backer**

We offer various options of Soft Sound® panel inserts to achieve a variety of NRC ratings. Please refer to our True NRC® table of ratings.

**Translucent Backer**

Our proprietary light diffusing backers can be used to create a functional or decorative lighting effect in any space.

① Illustrative images. Patterns may not match the product.

① Lighting powered by Arktura Driver. Refer to installation manual or contact your rep for more info.

2 Optional Accessories

Possible Configurations

Refer to the chart and corresponding diagrams below for available configuration options.

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
