

ARKTURA

Vapor® Graphic Perf®

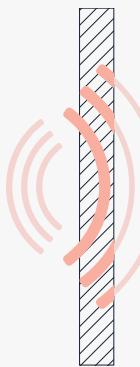

Customizable Ceiling & Wall Panels

Fueling Possibilities®

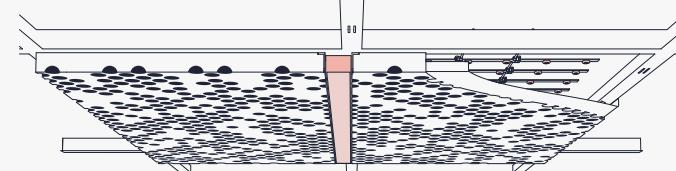

Our Key Features

Vapor® Graphic Perf® turns wall and ceiling tiles into a limitless canvas, combining the best aspects of two of Arktura's most popular offerings – Vapor® and Graphic Perf® – into one versatile system. Let Arktura apply its proprietary, algorithmic software and manufacturing expertise to transfer any image or pattern into perforated metal panels. Like our Vapor® Family of Products, these are fully compatible with Arktura's Vertika® wall channel and standard grid systems, to make installation across walls and ceilings effortless. Add available custom color, Soft Sound® acoustic backer panels, and Arktura's integrated lighting, and the opportunities are truly endless.

Reduce Noise & Enhance Acoustics

Vapor® Graphic Perf®'s optional Soft Sound® backer material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. The Soft Sound® backer works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

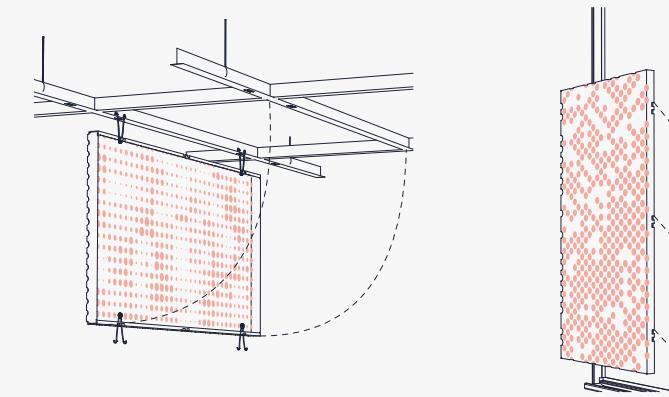

Integrated Lighting Options

Integrate illumination and lighting effects to your projects with Arktura's offering of lighting solutions such as InLine or Backlight.

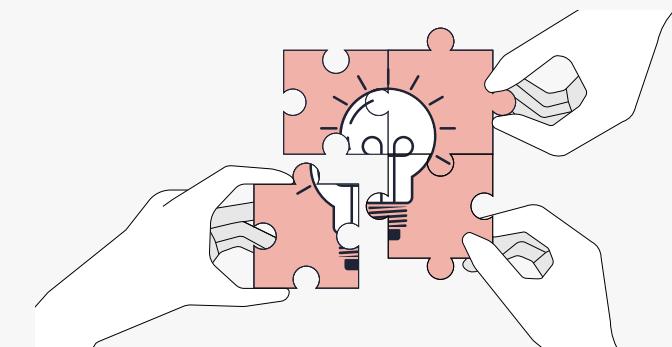

Scan the QR or Click to Learn More about Vapor®

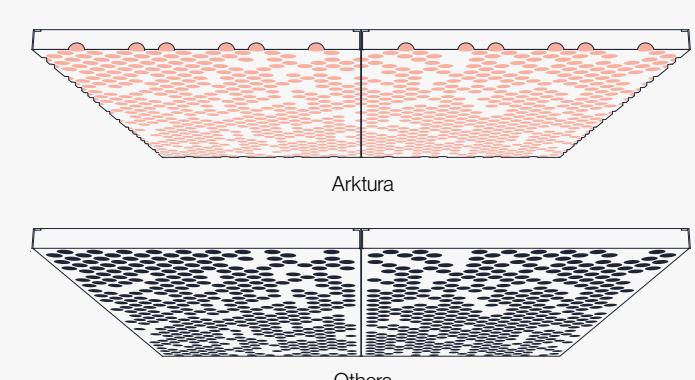

Easy Installation & Access

Vapor® Graphic Perf® panels offer easy install and access across walls and ceilings through quick torsion spring attachment to standard grid systems and a simple hook-on attachment to our Vertika® channel system.

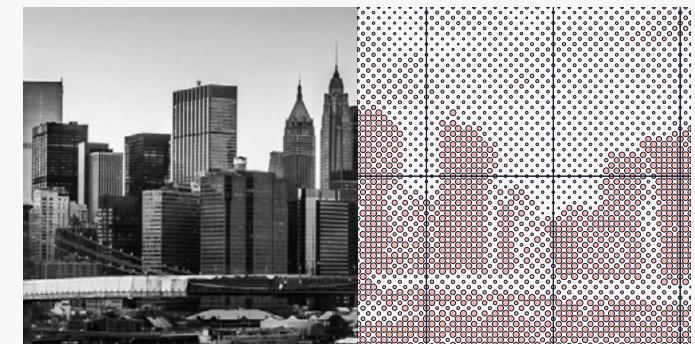

Collaborative Process

Our project managers translate your goals and design opportunities into a precise workflow. We factor in all base building criteria, then produce detailed software-generated shop drawings to guide our precision manufacturing.

Uninterrupted Pattern Across Panels

Achieve uninterrupted patterning across your space. Vapor® Graphic Perf® patterns have perforations that wrap around the edges of each panel, concealing where patterns start and end.

Customizable Pattern

Apply your creative vision to a standard system. We turn your image or custom pattern into easy-to-install perforated panels to create your desired effect across walls and ceilings.

Overview

- 1 Graphic Perf Process
- 2 Understanding the System
- 3 Optional Accessories

- 4 Available Finishes
- 5 Product Specifications

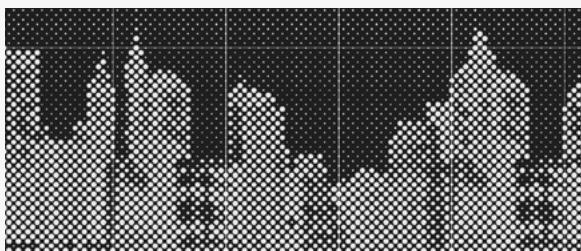

1 Graphic Perf Process

Option A: Photoreal

Your Image

The Graphic Perf® process starts with your image. Select the photo, logo, or graphic you want translated to metal. Inquire about available scripted options.

Translation

Our proprietary software help translate your image into pattern, spanning across panels to fit your desired space, and the needs of your project.

Perforation

We use state-of-the-art tools and techniques to precision manufacture seamlessly tileable grid compatible panels that bring your image to life.

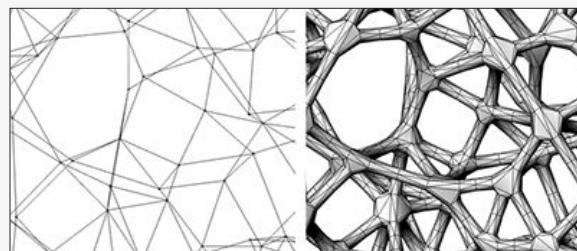

Option B: Scripted

Inspiration

You provide the reference, be it an image or sketch.

Computer Generated Artwork

Our software allows for a multitude of options to individually design each shape, perforation, and opening of your artwork.

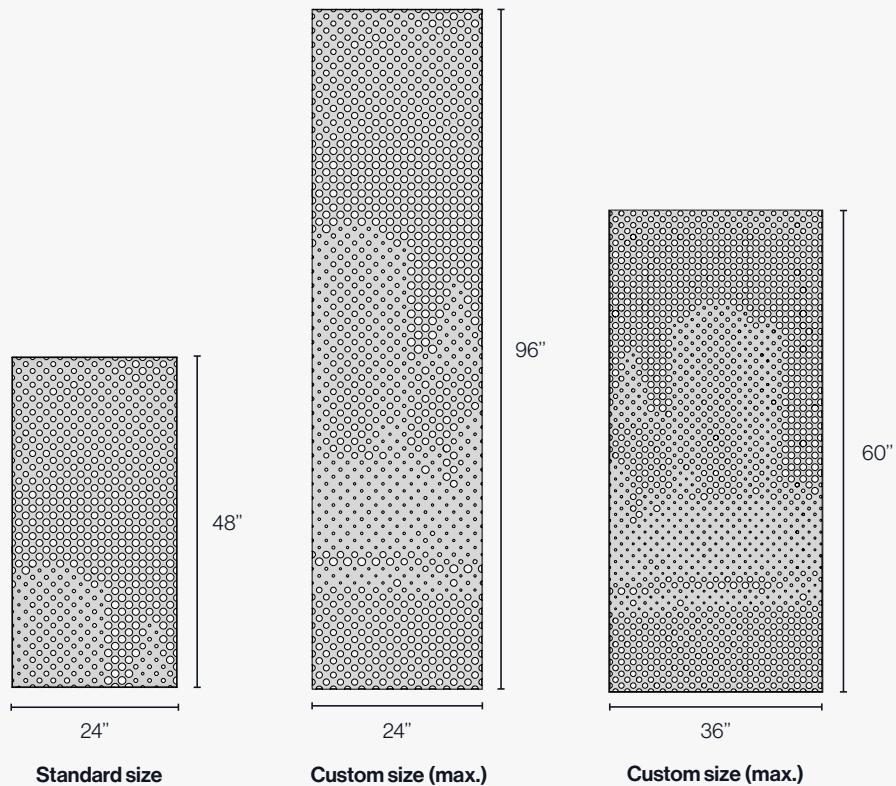

Perforation

We use state-of-the-art tools and techniques to precision manufacture seamlessly tileable grid compatible panels.

2 Understanding the System

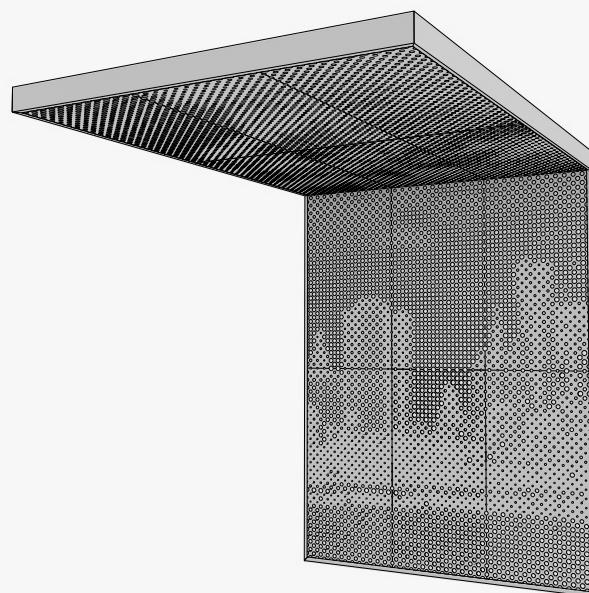

Standard Panel Sizes

Vapor® Graphic Perf® converts your design or image to metal across 24" x 48" panels, with custom sizes available up to 96" long and 36" wide.

Flexible Across Walls & Ceilings

Vapor® Graphic Perf® works equally well across walls or ceilings, and allows for seamless continuity of imagery and pattern across transition points.

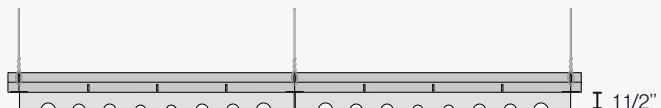

② Understanding the System

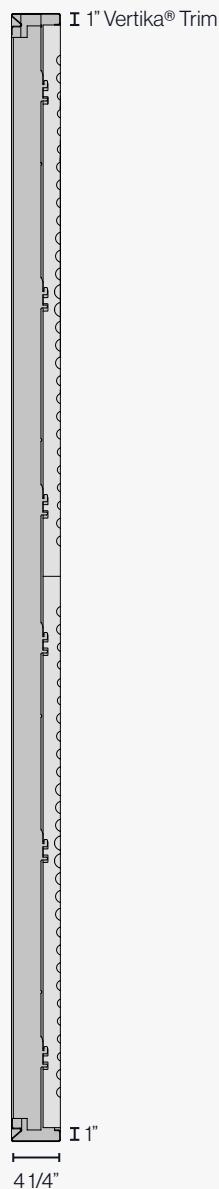

Understanding the Panel

We lay out your image seamlessly across panels and provide easy-to-follow instructions to use during installation.

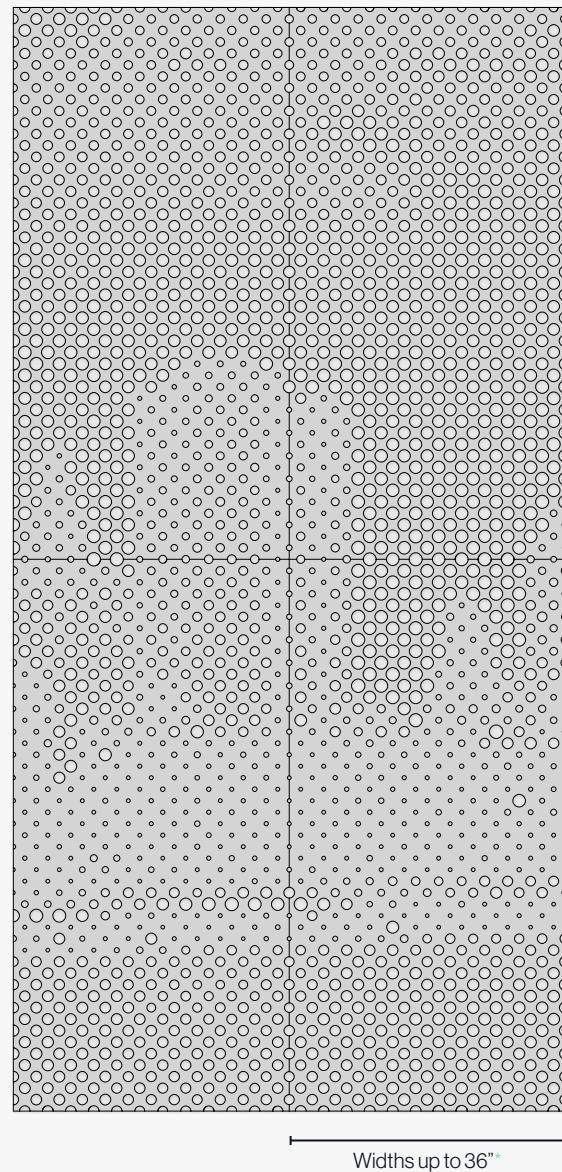

Ceiling Section

Wall Section

Panel Configuration, Wall or Ceiling

Heights up to 96"*

Widths up to 36"*

* Max sizes of 36" x 60" or 24" x 96". For larger panel sizes please contact your local rep.

! All dimensions nominal.

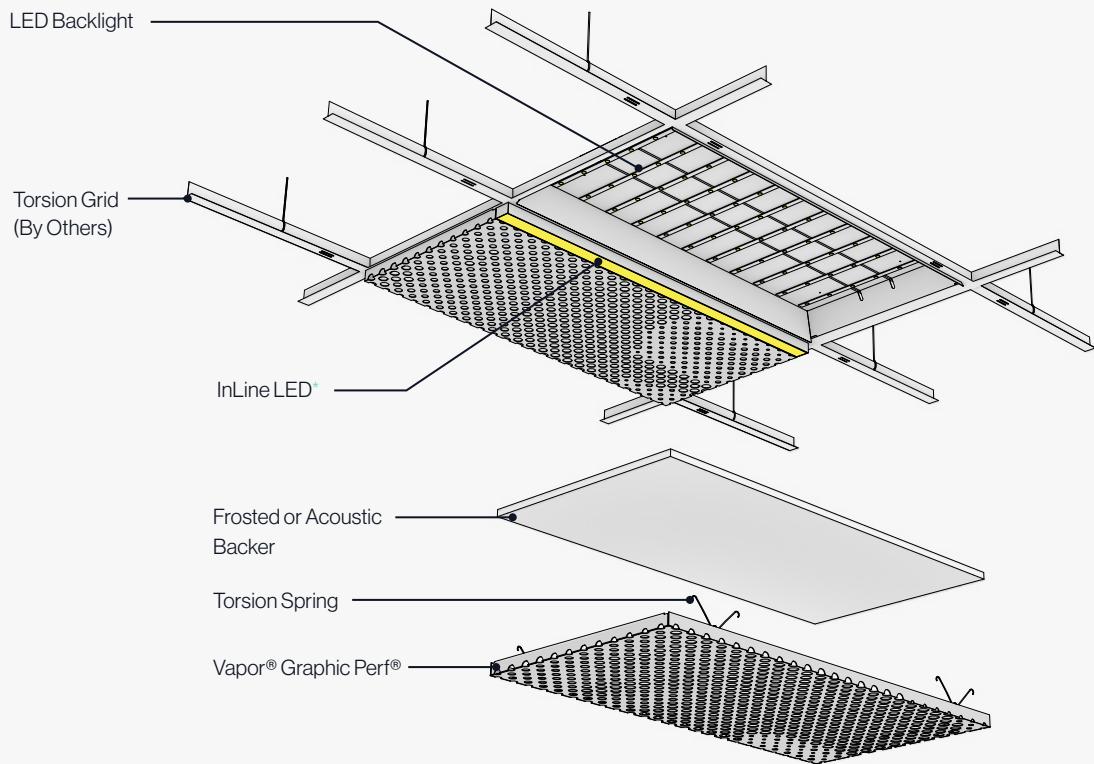

② Understanding the System

Accessory Options - Ceiling

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine downlight

 Check out our Configuration examples on PAGE 11.

* A Specific Inline light panel is used to accomodate the width of the fixture within the 2' width.

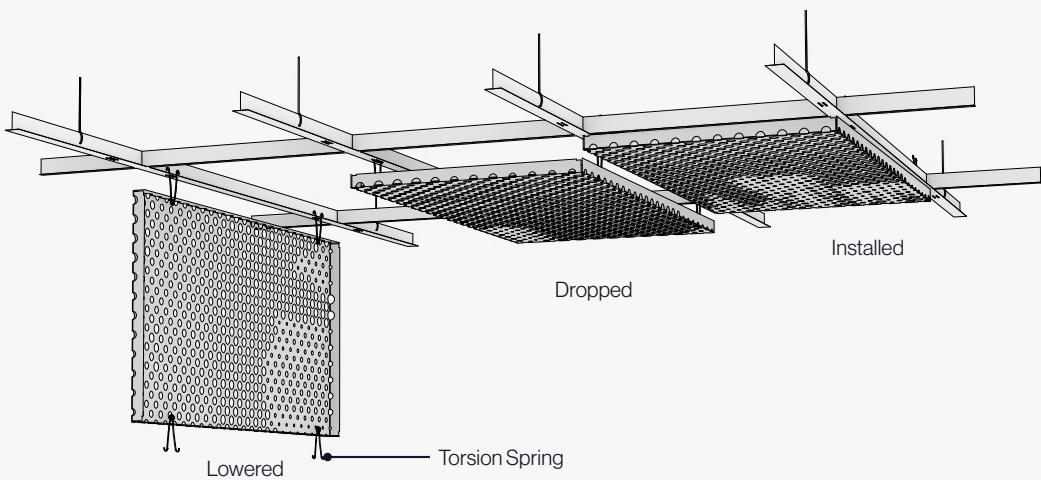

Torsion Spring Adapter Clip

Interested in using standard t-grid?
Use our optional Torsion Spring Adapter Clip.

Attachment System - Ceiling

Torsion Spring clips allow for rapid install and easy access for maintenance above the grid post install.

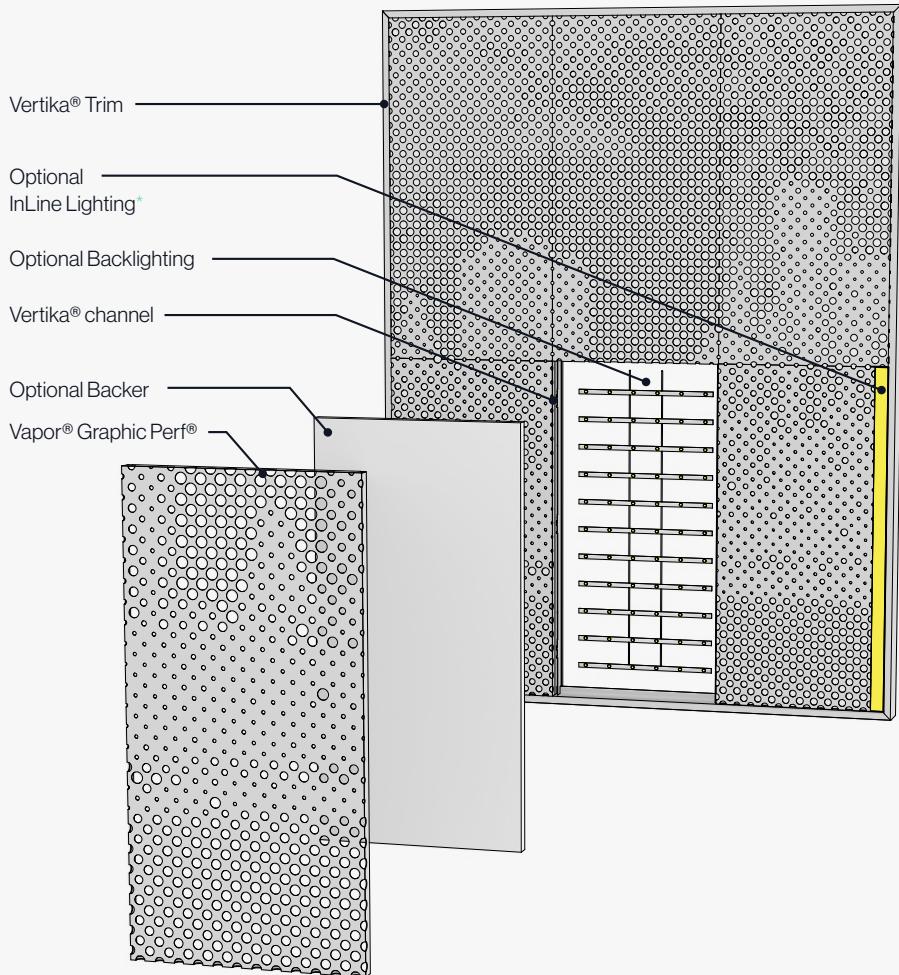

② Understanding the System

Accessory Options - Wall

- Frosted light diffusing backer
- 1/2" acoustic backer
- Backlight
- InLine light

 Check out our Configuration examples on PAGE 11.

* A Specific Inline light panel is used to accomodate the width of the fixture within the 2' width.

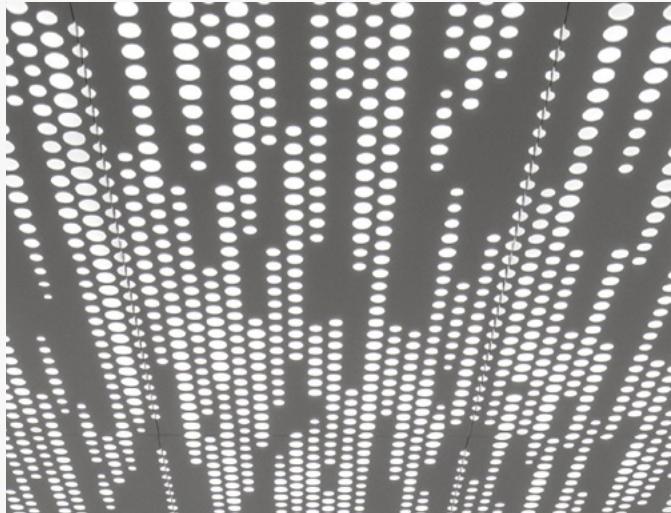

Attachment System - Wall

Panels are easily installed or removed by sliding onto or lifting off from the system's Vertika® channel hooks.

3 Optional Accessories

Lighting

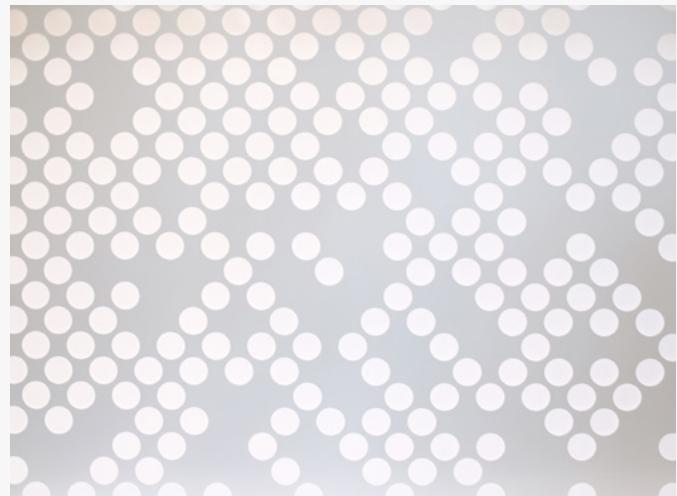

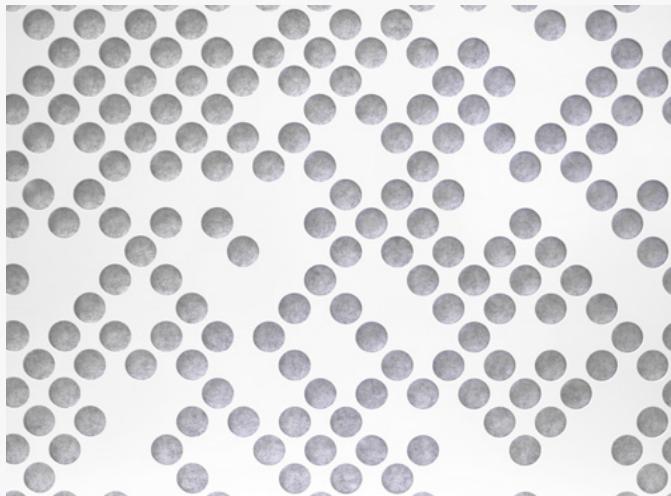

Backlighting

Arktura Backlighting allows you to fully illuminate your ceiling and wall panel installs, creating beautiful evenly lit surfaces. These fixtures are available in high and low output versions, both dimmable. See Backlighting specs details on PAGE 16.

InLine Lighting

Our InLine Light sits flush with the face of the panels while conveniently attaching to the bottom of the grid. The fixture is available in 4' and 8' lengths. A special side-light Vapor® panel allows the light to straddle its 4' edge while staying within a 24" overall width. See InLine Lighting specs details on PAGE 18.

Backers

Acoustic Backer

We offer various options of Soft Sound® panel inserts to achieve a variety of NRC ratings. Please refer to our True NRC® table of ratings.

Translucent Backer

Our proprietary light diffusing backers can be used to create a functional or decorative lighting effect in any space.

 Illustrative diagrams. Perforations will be custom to your design.

③ Optional Accessories

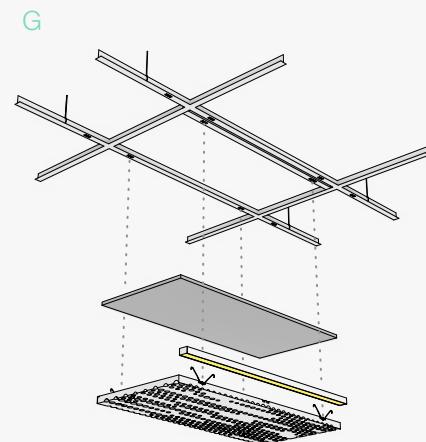

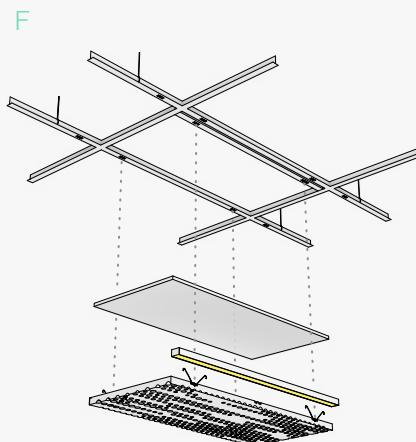

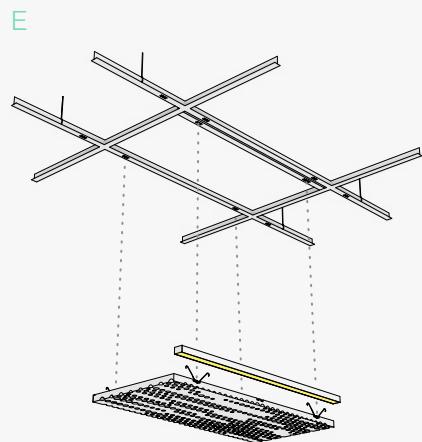

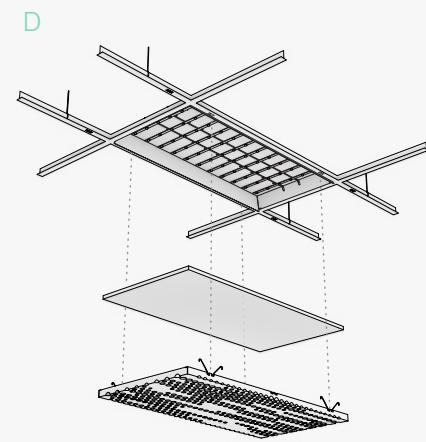

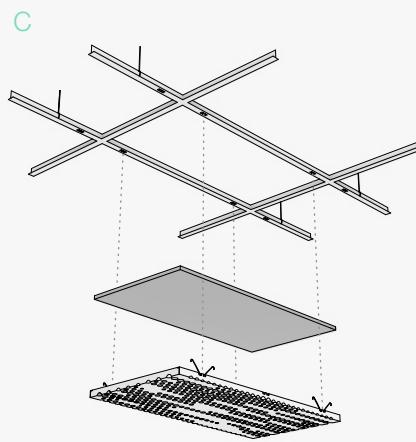

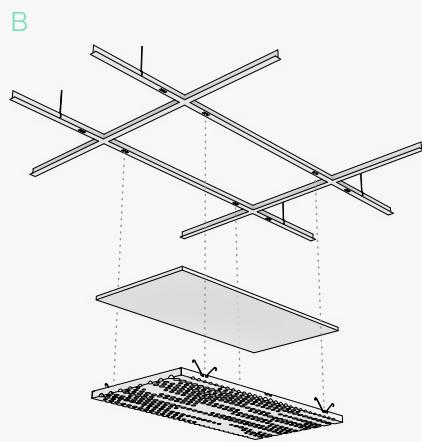

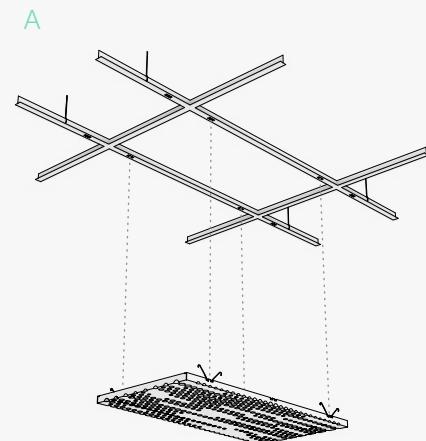

Possible Configurations

Refer to the chart and corresponding diagrams below for available configuration options.

	No Backer	Translucent Backer	Soft Sound® Backer
No light	A	B	C
Backlight		D	
InLine	E	F	G

 Looking to combine backlight with acoustic performance in the same panel?

Check out our VaporSoft® line.

⚠ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a product's performance for light transmittance, a mockup of the specific intended use is recommended.
