Arborisa® Denza

Ceiling **Baffles**

Fueling Possibilities®

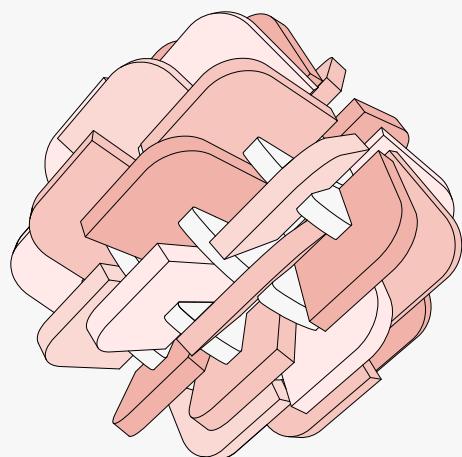

Our Key Features

Arborisa® Denza features a dense array of acoustic comfort made of our Soft Sound® material. Highlighted by a combination of intersecting fins and baffles transforms Denza into an exceptional aesthetic for your next project. This sound attenuating canopy of biomorphic branch-like clouds can connect with other Denza modules creating unique biophilic-inspired acoustic layouts. Install in tandem with other geometric acoustic modules to create one-of-a-kind spaces filled with balance and design variation.

Acoustic Performance

Arborisa's Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. Its material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

Expansive Soft Sound® Library

Customize your Arborisa system by specifying modules in your preferred finish. Choose from an extensive colorful library of Soft Sound finishes and premium wood textures.

Our Key Features

Organic Biophilic Design

Inspired by the natural look of a lush tree canopy, Arborisa mimics the appearance of expansive tree branches to create acoustic cloud systems. Assemble an organic, continuous, and non-repetitive surface with Arborisa modules inspired by nature's biomorphic forms and patterns.

Open Accessibility in Plan

Arborisa's open grid design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

Duo Capability

For further customization of your Arborisa system, mix and match colors with Duo finish capabilities. Mix colors and textures in an expanding range of dynamic combinations to fully achieve your design intent. Perfect for incorporating branding or composing a dynamic two-tone transformative field.

Inspiration

Create a continuous plane of acoustic attenuation, in Duo tone Soft Sound configurations

Open Plan Easily Integrates Lighting & Building Systems

Reduce the Appearance of a Gridded System

Standard Module

Single Arborisa modules, made from Arktura's Soft Sound® acoustic material, can mitigate noise in a concentrated area.

Designing with Modules

Install multiple Arborisa modules in tandem, to create a wide array of acoustic attenuation. Modules may be placed in a continuous plane or stepped in section for a multifaceted look.

Attachment Details

For arrayed layouts, Arborisa Denza allows multiple modules to be connected together via baffles thanks to a Module joining bracket.

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a product's performance for light transmittance, a mockup of the specific intended use is recommended.

3 Product Specifications & Certifications

System Specs

Dimensions (WxLxD)	8'-0" x 8'-0" x (Min. 2 3/4" Max. 4 3/4")
Material	12mm Soft Sound® (PET), Stainless Steel
Openness in Plan	74%
Fire Rating	ASTM E84 - Class A
Acoustics	True NRC® 0.65: Ceiling ; F-100 Method
Attachment Method	1/16" Stainless Cable and Hardware
Accessibility	Yes, quick release cables
Trimmability	No
