Atmosfera[®] Ripple

Adaptive Ceiling Baffles

Our Key Features

Ripple's panels create an undulating effect on your ceiling design, adding movement and flow. Customizable, you can ensure that the amount of curve fits your vision exactly. Ripple's panels are available in steel only and can be powder coated in one of our five standard colors.

Continuous Frames & Fins

Utilizing a hidden fin and frame alignment system Atmosphaera® provides continuity in all directions across your space. Our custom formulated material thickness and density ensures rigidity that limits deflection.

Customizable Topography

Atmosphaera® offers a range of configurable options, allowing you to customize fin topography to fit your space and design vision, with the help of our project team.

Our Key Features

Open Plan Accessibility

Atmosfera®'s open design makes integrating systems above or below the modules simple and feasible. Easily removable fins and open structure makes accessing lights, HVAC, rigging points, plumbing, AV equipment, and life safety systems easy for your maintenance team.

No Field Trimming Necessary

All modules are built to your unique project specifications, removing the need for any field trimming and assuring easy installation.

Inspiration

Easily Integrate Lights and Other Building Systems

Organic Textured Ceiling

Customize Ripples to Fit Your Space

Overview

- 1 Customization Process
- 3 Available Finishes
- 2 Understanding the System
- 4 Product Specifications

1 Customization Process

Our project management team will pre-design all of the modules to work in your space. We will coordinate around columns, lights, HVAC, building envelope, and partitions as needed.

2 Understanding the System

Single Module

Atmosfera® Ripple curving fins are available in steel.

Multiple Modules

Modules can be continuously tiled in multiple directions in plan, using the provided connecting brackets.

2 Understanding the System

Understanding the Module

Plan

Atmosfera® Ripple lets you design undulations in plan. Create flowing designs that create your desired look while adapting to and concealing building elements such as sensors, sprinklers, and lighting.

93% Open

Elevation

Define the depth and length of the undulations of your design across your space in elevation, using a range of depths from 5" to 16". Create subtle ebbs or more turbulent waves.

2 Understanding the System

Attachment Details

Atmosfera® systems are designed for ease of install and assembly.

4 Product Specifications

System Specs

Fin Material	20GA Steel
Module Dimension	11' x 11'-11"
Fin Depth	5"
Openness in Plan	93%
Frame Material	Steel
Fire Rating	ASTME84 - Class A
Acoustics	True NRC®: Results Vary
Attachment Method	3/8" Threaded Rod

This product may be the subject of one or more patents or pending patent applications.
