# SoftSpan<sup>®</sup> Taper 24

Open & Closed **Grid Ceiling**

# Our Key Features

SoftSpan® Taper 24 blends acoustic performance and sophisticated tapered design. Crafted from our 12mm Soft Sound® material, this ceiling system offers remarkable sound absorption while embodying the aesthetic elegance of coffered ceilings. With a customizable design that seamlessly integrates with existing SoftSpan® systems and SoundBar®, the SoftSpan® Taper 24 is ideal for creating intimate environments in commercial settings. Its lightweight structure and cable-hung design make installation a breeze, while the optional coffers enhance its visual appeal.

## Reduce Noise & Enhance Acoustics

SoftSpan® Taper Soft Sound® material reduces the impact of noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. SoftSpan® Taper material works in concert with the design to help reduce and control reverberations leaving a lasting impression at scales ranging from assembly halls to conference rooms.

## Accessories

Explore our range of accessory options. Enhance acoustic performance with Soft Sound® Coffered Panels, enclose modules with optional perimeter beam and corner modules to expand design possibilities.

More about SoftSpan® Taper

## Our Key Features

### Timber Trellis without the Weight

SoftSpan® Taper in Soft Sound® Wood Texture brings the aesthetics of a timber trellis into your space without the weight while also adding acoustic performance.

### Open Accessibility in Plan

SoftSpan® Taper open grid design makes integrating systems above or below the modules simple and feasible. Easily accessible open trellis beam structure makes accessing lighting, HVAC, rig points, plumbing, and life safety systems simple.

### Preconfigured Field Trimmable Solution

SoftSpan® Taper modules can be trimmed in the field. By rearranging our adjustable hangers, we make it easy for you to specify standard modules that can be easily field-modified around anticipated and unforeseen site conditions during install.

### Compatible with SoundBar®

SoftSpan® Taper 24 offers connectivity with SoundBar® acoustic baffles, to create a multitude of unique layouts with visual continuity across as space, incorporating SoundBar®'s linear lighting as desired.

# Inspiration

**Introduce Seamless of Trellis to Enhance Acoustic Comfort and Wellness in Any Space**

**Tapered baffles create visual intrigue across your space**

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.

ⓘ All premium and standard finishes shown are designed for interior specifications. Products may be specified for exterior use, and with alt treatments required by local code or facility, including custom color match or specialty finishes. Any changes to specification from interior standard or interior premium will result in a custom powder coat fee.
