SoundForm®

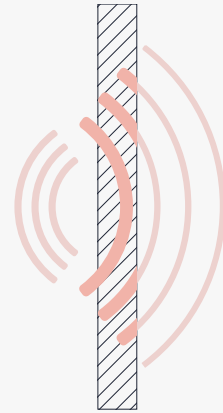

Wall Panels

Fueling Possibilities®

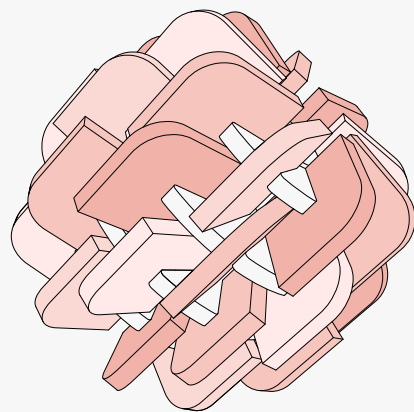

Our Key Features

SoundForm® is a modular acoustic wall solution designed to enhance commercial interiors with architectural depth and visual rhythm. Available in three sculptural profile geometries, curved, rectangular, and V-shaped flutes, these three-dimensional acoustic panels provide effective acoustic performance alongside a visually appealing surface. Optional lighting creates a unique interplay of light and shadow.

Reduce Noise & Enhance Acoustics

SoundForm®'s Soft Sound® material reduces noise from everyday annoyances like ringing, typing, and chatter resulting in a more pleasant and productive environment. This acoustic material works to help reduce and control reverberations and diffuse sound while enhancing wellness in spaces from busy office environments to soothing waiting rooms.

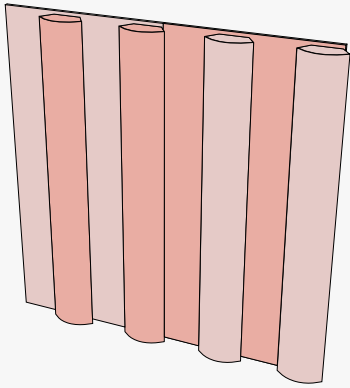

Expansive Soft Sound® Library

Choose from a large library of Soft Sound® colors and wood textures. Mix and match colors to accent fins and complement the color scheme of your space.

More about SoundForm®

Our Key Features

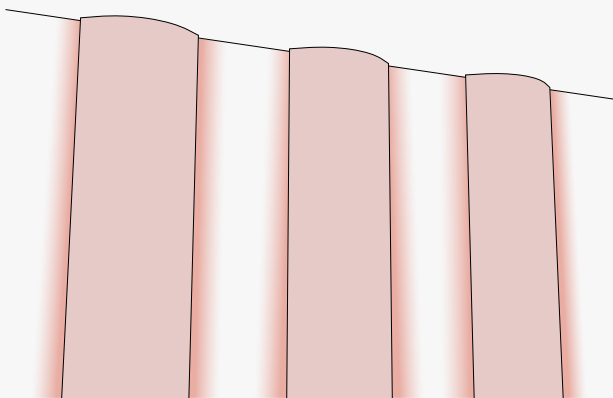

Duo Capability

Add new dimensions of style, mix background and flute colors in an expanding range of dynamic combinations to fully achieve your design intent. Perfect for incorporating branding or creating a dynamic, two-tone composition.

Customizable

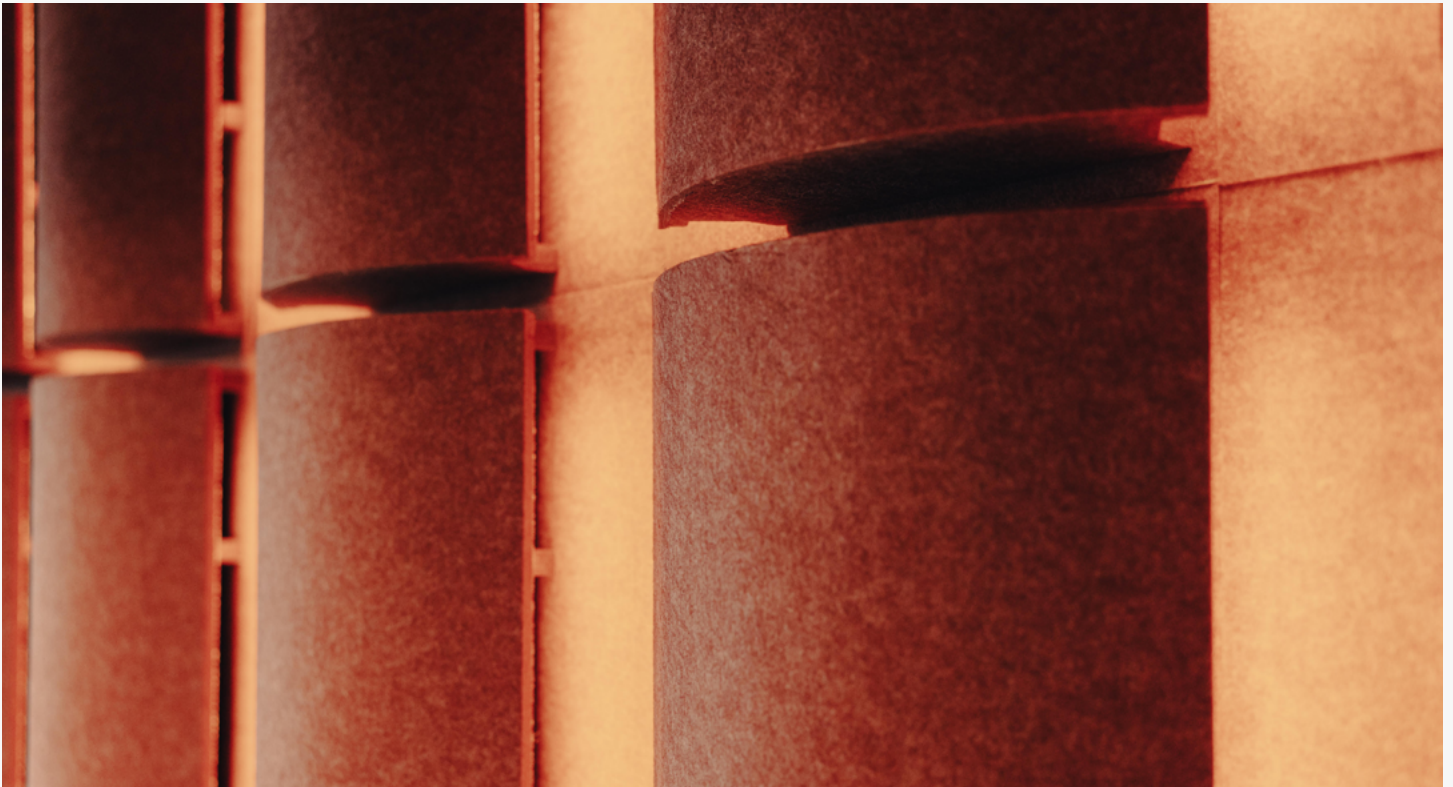

SoundForm® can be further customized by selecting various height/widths, staggered profiles, alternating flute shapes, as well as the spacing between flutes.

Integrated Lighting

SoundForm® with optional lighting arrives pre-installed with all lighting components, ensuring a quick and straightforward installation process.

Inspiration - Arc

Mix and match colors including wood textures

Optional lighting creates a unique interplay of light and shadow

Inspiration - Peak

Create a visual focal point while also providing functional sound absorption

Lighting arrives pre-installed on SoundForm® modules

Inspiration - Plank

Customize your design by specifying different flute profiles

Further customize SoundForm® by selecting various height/widths, staggered profiles and more

3 Available Finishes

Module & End Cover Color

Soft Sound®
Standard

ⓘ Due to the nature of non-woven materials, light may pass through Soft Sound® in any thickness or color. A translucent appearance is most apparent in lighter colors and thin material when a light source is present behind the material. Arktura makes no claims or warranties about the material performing as opaque in any circumstance. To verify a products performance for light transmittance, a mockup of the specific intended use is recommended.
